Abstracts

Batteries are valued as devices that store chemical energy and convert it into electrical energy. It contains a number of different metals including lithium, nickel, aluminum, iron, manganese and cobalt. Elements like lithium and nickel can be used to make many types of batteries. Gen Consulting Company estimates the global battery metals market will total USD 21,582 million by 2028, an average annual growth of 8.4 percent during the forecast period, according to the latest edition of the Global Battery Metals Market Report.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global battery metals market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the battery metals industry.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the product, application, and region. The global market for battery metals can be segmented by product: cobalt, lithium, nickel, others. Battery metals market is further segmented by application: consumer electronics, electric vehicles, energy storage systems, others. Based on region, the battery metals market is segmented into: Asia Pacific, Europe, North America, Rest of the World (RoW).

By product:

cobalt

lithium

nickel

others

By application:

consumer electronics

electric vehicles

energy storage systems

others

By region:

Asia Pacific

Europe

North America

Rest of the World (RoW)

The report also provides analysis of the key companies of the industry and their detailed company profiles including Albemarle Corporation, BASF SE, China Molybdenum Company Limited, Finnish Minerals Group (FMG), Glencore plc, Honjo Metal Co., Ltd., Jiangxi Ganfeng Lithium Co., Ltd., LG Chem Ltd., OJSC MMC Norilsk Nickel, SQM S. A., Sumitomo Metal Mining Co., Ltd., Tianqi Lithium Corporation, Umicore N.V., Vale S.A., Xiamen Tungsten Co., Ltd., among others.

Historical & Forecast Period

This research report provides analysis for each segment from 2018 to 2028 considering 2021 to be the base year.

Scope of the Report

To analyze and forecast the market size of the global battery metals market.

To classify and forecast the global battery metals market based on product, application, region.

To identify drivers and challenges for the global battery metals market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global battery metals market.

To identify and analyze the profile of leading players operating in the global battery metals market.

Why Choose This Report

Gain a reliable outlook of the global battery metals market forecasts from 2022 to 2028 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.
