Abstracts

Benfotiamine is a substance derived from thiamine (a B vitamin also known as vitamin B1). Consuming benfotiamine is said to raise the levels of thiamine and, in turn, protect against health conditions associated with low thiamine levels. Benfotiamine is marketed as a dietary supplement in most of the developed world, and as a pharmaceutical drug in some countries for treating diabetic neuropathy.

The report covers forecast and analysis for the benfotiamine market on a global and regional level. The study provides historic data of 2012-2016 along with a forecast from 2017 to 2022 based on both output/volume and revenue. The study then describes the drivers and restraints for the benfotiamine market along with the impact they have on the demand over the forecast period. Additionally, the report includes the study of opportunities available in the benfotiamine market on a global level.
