Abstracts

Biosimilars are highly similar to the reference product in terms of safety, purity and potency, but may have minor differences in clinically inactive components. Any differences are carefully evaluated by manufacturers and reviewed by the FDA to ensure the biosimilar meets the Agency's appropriately high approval standards. According to market research study published by Gen Consulting Company, the global biosimilars market is expected to reach approximately USD 71,843 million, representing a CAGR of 28.9% during the forecast period 2022-2028.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global biosimilars market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the biosimilars industry.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the type, application, and region. The global market for biosimilars can be segmented by type: fusion protein, monoclonal antibodies, recombinant growth factors, recombinant hormones, others. Among these, the monoclonal antibodies segment was accounted for the highest revenue generator in 2021. Biosimilars market is further segmented by application: autoimmune and inflammatory, blood disorders, diabetes, growth hormone deficiency, infectious diseases, oncology, others. The oncology segment is estimated to account for the largest share of the global biosimilars market. Based on region, the biosimilars market is segmented into: Asia Pacific, Europe, North America, Rest of the World (RoW). Europe held the largest share of the global biosimilars market in 2021 and is anticipated to hold its share during the forecast period.

Historical & Forecast Period

This research report provides analysis for each segment from 2018 to 2028 considering 2021 to be the base year.

Scope of the Report

To analyze and forecast the market size of the global biosimilars market.

To classify and forecast the global biosimilars market based on type, application, region.

To identify drivers and challenges for the global biosimilars market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global biosimilars market.

To identify and analyze the profile of leading players operating in the global biosimilars market.

Why Choose This Report

Gain a reliable outlook of the global biosimilars market forecasts from 2022 to

2028 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.
