Abstracts

Caffeine is a substance that is naturally produced in the leaves and seeds of many plants, including coffee beans, guarana, yerba mat?, cacao beans, and tea. It works by stimulating the central nervous system, which can help to increase alertness, improve mood, and reduce fatigue. It also has a diuretic effect, which can increase urine production and help to flush toxins from the body. Commercially, caffeine is produced from urea and cyanoacetic acid rather than extracted from plant products. According to the latest data, the market size of the global caffeine sector is expected to rise by USD 134.2 million with a CAGR of 4.3% by the end of 2029.
