Abstracts

The term cloud gaming refers to playing a game remotely from the cloud. In nearly every case, cloud refers to a network of data centers filled to the brim with servers that deliver content to whomever is trying to access it. Cloud gaming allows players to stream games to the supported devices (phone, tablet, TV) with a high-speed internet connection. Cloud gaming can be advantageous as it eliminates the need to purchase expensive computer hardware or install games directly onto a local game system.
