Abstracts

One of the key advantages of commercial satellite imaging is its ability to capture images of large areas of the Earth's surface quickly and efficiently. This makes it an ideal tool for monitoring and responding to natural disasters, tracking changes in land use and vegetation cover, and detecting and monitoring environmental hazards such as oil spills or wildfires. Commercial satellite imaging is also used in the defense and security industries for intelligence gathering and surveillance purposes. Images captured by commercial satellites can provide valuable information about military activities, infrastructure, and potential threats. The global commercial satellite imaging market is projected to rise by USD 4.3 billion by 2029, according to the latest market study results. It is anticipated to expand at a CAGR of 11.7 percent during the forecast period.

The report covers market size and growth, segmentation, regional breakdowns, competitive landscape, trends and strategies for global commercial satellite imaging market. It presents a quantitative analysis of the market to enable stakeholders to capitalize on the prevailing market opportunities. The report also identifies top segments for opportunities and strategies based on market trends and leading competitors' approaches.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the technology, application, and region. The global market for commercial satellite imaging can be segmented by technology: synthetic aperture radar (SAR), optical. The optical segment was the largest contributor to the global commercial satellite imaging market in 2022. Commercial satellite imaging market is further segmented by application: urban development, agriculture, environment, energy, infrastructure, disaster and emergency management, defense, others. According to the research, the defense segment had the largest share in the global commercial satellite imaging market. Based on region, the commercial satellite imaging market is

segmented into: North America, Europe, Asia-Pacific, MEA (Middle East and Africa), Latin America. North America held the largest revenue share in 2022.

Market Segmentation

By technology: synthetic aperture radar (SAR), optical

By application: urban development, agriculture, environment, energy, infrastructure, disaster and emergency management, defense, others

By region: North America, Europe, Asia-Pacific, MEA (Middle East and Africa), Latin America

The report explores the recent developments and profiles of key vendors in the Global Commercial Satellite Imaging Market, including Airbus Defence and Space S.A., BlackSky Technology Inc., EagleView Technologies Inc., European Space Imaging GmbH, GeoOptics Inc., Iceye Oy, Imagesat International N.V., L3Harris Technologies Inc., Maxar Technologies Inc., Planet Labs PBC, among others. In this report, key players and their strategies are thoroughly analyzed to understand the competitive outlook of the market.

Scope of the Report

To analyze and forecast the market size of the global commercial satellite imaging market.

To classify and forecast the global commercial satellite imaging market based on technology, application, region.

To identify drivers and challenges for the global commercial satellite imaging market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global commercial satellite imaging market.

To identify and analyze the profile of leading players operating in the global commercial satellite imaging market.

Why Choose This Report

Gain a reliable outlook of the global commercial satellite imaging market forecasts from 2023 to 2029 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.

Contents

PART 1. INTRODUCTION

Report description
Objectives of the study
Market segment
Years considered for the report
Currency
Key target audience

PART 2. METHODOLOGY

PART 3. EXECUTIVE SUMMARY

PART 4. MARKET OVERVIEW

Introduction
Drivers
Restraints

PART 5. MARKET BREAKDOWN BY TECHNOLOGY

Synthetic aperture radar (SAR)
Optical

PART 6. MARKET BREAKDOWN BY APPLICATION

Urban development
Agriculture
Environment
Energy
Infrastructure
Disaster and emergency management
Defense
Others

PART 7. MARKET BREAKDOWN BY REGION

North America

Europe

Asia-Pacific

MEA (Middle East and Africa)

Latin America

PART 8. KEY COMPANIES

Airbus Defence and Space S.A.

BlackSky Technology Inc.

EagleView Technologies Inc.

European Space Imaging GmbH

GeoOptics Inc.

Iceye Oy

Imagesat International N.V.

L3Harris Technologies Inc.

Maxar Technologies Inc.

Planet Labs PBC

DISCLAIMER

I would like to order

Product name: Global Commercial Satellite Imaging Market 2023-2029

Product link: <https://marketpublishers.com/r/GD966D762016EN.html>

Price: US\$ 2,650.00 (Single User License / Electronic Delivery)
