## Abstracts

A standard hammer drill employs a rotary action which can be supplemented by a series of fast and hard impacts to the back of the chuck. This extra force enables a masonry drill bit to punch its way through hard materials, rather than just cutting into them like a drill bit for wood or metal would. According to latest analysis by Gen Consulting Company, the global cordless hammer drills market was USD 1,244 million in 2022 and is expected to reach USD 2,174 million in 2029 and register a CAGR of 8.3% during the forecast period, 2023-2029.

The report covers market size and growth, segmentation, regional breakdowns, competitive landscape, trends and strategies for global cordless hammer drills market.
