Abstracts

Data centers are the brains of practically every company whose success depends on efficient and reliable software operations. With lots of powerful hardware concentrated in one place, data centers must be kept cool and safeguarded against both external and internal environmental influences. The global data center precision air conditioner market was estimated at USD 1,947 million in 2021 and is expected to hit USD 2,632 million by 2028, registering a CAGR of 4.4% from 2022 to 2028 as per the latest report by Gen Consulting Company.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global data center precision air conditioner market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the data center precision air conditioner industry.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the product, technology, tier I and tier II, and region. The global market for data center precision air conditioner can be segmented by product: computer room air conditioning (CRAC) unit, computer room air handlers (CRAH) unit. Data center precision air conditioner market is further segmented by technology: centralized cooling, in-rack cooling, in-row cooling. The in-row cooling segment was the largest contributor to the global data center precision air conditioner market in 2021. Based on tier I and tier II, the data center precision air conditioner market is segmented into: tier III, tier IV. The tier III segment is estimated to account for the largest share of the global data center precision air conditioner market. On the basis of region, the data center precision air conditioner market also can be divided into: North America, Asia Pacific,

Europe, Rest of the World (ROW).

By product:

computer room air conditioning (CRAC) unit

computer room air handlers (CRAH) unit

By technology:

centralized cooling

in-rack cooling

in-row cooling

By tier I and tier II:

tier III

tier IV

By region:

North America

Asia Pacific

Europe

Rest of the World (ROW)

The report also provides analysis of the key companies of the industry and their detailed company profiles including AIRSYS North America, LLC, ClimateWorx International Inc., Data Aire, Inc., Delta Electronics, Inc., Eaton Corporation plc, EMICON A.C. SpA,

Huawei Technologies Co., Ltd., Renovo Zhuihai Ltd., Rittal North America LLC, Schneider Electric SE, STULZ GMBH, Swegon AB, Vertiv Holdings Co., among others.

Historical & Forecast Period

This research report provides analysis for each segment from 2018 to 2028 considering 2021 to be the base year.

Scope of the Report

To analyze and forecast the market size of the global data center precision air conditioner market.

To classify and forecast the global data center precision air conditioner market based on product, technology, tier I and tier II, region.

To identify drivers and challenges for the global data center precision air conditioner market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global data center precision air conditioner market.

To identify and analyze the profile of leading players operating in the global data center precision air conditioner market.

Why Choose This Report

Gain a reliable outlook of the global data center precision air conditioner market forecasts from 2022 to 2028 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.
