## Abstracts

Dicyclopentadiene (DCPD), also known as 3a,4,7,7a-tetrahydro-4,7-methano-1H-indene, (endo) or (exo) tricycle[5.2.1.0 (2,6)]deca-3,8-diene or cyclopentadiene dimer is a white crystalline solid at room temperature with a distinctive odor. DCPD products may be best characterised as highly reactive intermediates since they react readily with other monomers and find application in the production of resins, alkyds, acrylates, latexes and other specialty intermediates. The major use is in resins, particularly, hydrocarbon resins and unsaturated polyester resins. It is also used in insecticides, as a hardener and dryer in linseed and soybean oil, and in the production of EPDM (ethylene propylene diene monomer) elastomers, metallocenes, resins, varnishes, and paints.

The report covers forecast and analysis for the dicyclopentadiene market on a global and regional level. The study provides historic data of 2012-2016 along with a forecast from 2017 to 2022 based on both volumes and revenue. The study includes drivers and restraints for the dicyclopentadiene market along with the impact they have on the demand over the forecast period.
