Abstracts

DNA vaccines are third-generation vaccines. They contain DNA that codes for specific proteins (antigens) from a pathogen. DNA vaccines have emerged as a safer alternative to standard live and inactivated vaccines for treating human and animal viral diseases. They exhibit several advantages over traditional strategies in terms of safety, stability, ease of manufacturing, and immunogenicity. The market for DNA Vaccines worldwide is expected to reach USD 18,832 million by 2028, recording a CAGR of 30.1% over the forecast period as per the latest report by Gen Consulting Company.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global DNA Vaccines market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the DNA Vaccines industry.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the type, application, and end user. The global market for DNA Vaccines can be segmented by type: clinical applications, research tools. The research tools segment is estimated to account for the largest share of the global DNA Vaccines market. DNA Vaccines market is further segmented by application: genetic immunization, pDNA formulations. The genetic immunization segment held the largest revenue share in 2021. Based on end user, the DNA Vaccines market is segmented into: animal health, biodefense, cancers, infectious diseases, others. Globally, the cancers segment made up the largest share of the DNA Vaccines market.

By type:

clinical applications

research tools

By application:

genetic immunization

pDNA formulations

By end user:

animal health

biodefense

cancers

infectious diseases

others

The report has also analysed the competitive landscape of the global DNA Vaccines market with some of the key players being Astellas Pharma Inc., AstraZeneca plc, Bristol Myers Squibb Company (BMS), Gilead Sciences, Inc., Johnson & Johnson, Merck KGaA, Novartis International AG, Pfizer Inc., Sanofi S.A., among others.

Historical & Forecast Period

This research report provides analysis for each segment from 2018 to 2028 considering 2021 to be the base year.

Scope of the Report

To analyze and forecast the market size of the global DNA Vaccines market.

To classify and forecast the global DNA Vaccines market based on type, application, end user.

To identify drivers and challenges for the global DNA Vaccines market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global DNA Vaccines market.

To identify and analyze the profile of leading players operating in the global DNA Vaccines market.

Why Choose This Report

Gain a reliable outlook of the global DNA Vaccines market forecasts from 2022 to 2028 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.

Contents

PART 1. INTRODUCTION

Report description
Objectives of the study
Market segment
Years considered for the report
Currency
Key target audience

PART 2. METHODOLOGY

PART 3. EXECUTIVE SUMMARY

PART 4. MARKET OVERVIEW

Introduction
Drivers
Restraints
Impact of COVID-19 pandemic

PART 5. MARKET BREAKDOWN BY TYPE

Clinical applications
Research tools

PART 6. MARKET BREAKDOWN BY APPLICATION

Genetic immunization
PDNA formulations

PART 7. MARKET BREAKDOWN BY END USER

Animal health
Biodefense
Cancers
Infectious diseases
Others

PART 8. KEY COMPANIES

Astellas Pharma Inc.

AstraZeneca plc

Bristol Myers Squibb Company (BMS)

Gilead Sciences, Inc.

Johnson & Johnson

Merck KGaA

Novartis International AG

Pfizer Inc.

Sanofi S.A.
