Abstracts

Dried blood spot collection cards are used in medical settings as a way to collect and transport blood samples for analysis. These cards are made of a filter paper that is specially designed to absorb small amounts of blood from a finger prick or a heel prick. Once the blood is absorbed on the card, it is dried and preserved for further testing. Dried blood spot collection cards have several advantages over traditional blood collection methods. They are less invasive, requiring only a small amount of blood to be collected, and can be collected by non-medical personnel in remote or low-resource settings. They are also easily transportable and do not require special handling or storage conditions. The global dried blood spot collection cards market is expected to increase by USD 88.3 million, at a compound annual growth rate (CAGR) of 4.35% from 2023 to 2029, according to the latest edition of the Global Dried Blood Spot Collection Cards Market Report.

The report covers market size and growth, segmentation, regional breakdowns, competitive landscape, trends and strategies for global dried blood spot collection cards market. It presents a quantitative analysis of the market to enable stakeholders to capitalize on the prevailing market opportunities. The report also identifies top segments for opportunities and strategies based on market trends and leading competitors' approaches.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the card type, application, and region. The global market for dried blood spot collection cards can be segmented by card type: Whatman 903, Ahlstrom 226, FTA, Others. The Whatman 903 segment held the largest share of the global dried blood spot collection cards market in 2022 and is anticipated to hold its share during the forecast period. Dried blood spot collection cards market is further

segmented by application: newborn screening (NBS), infectious diseases testing, therapeutic drug monitoring, forensics, CRO/research, others. Globally, the newborn screening (NBS) segment made up the largest share of the dried blood spot collection cards market. Based on region, the dried blood spot collection cards market is segmented into: North America, Europe, Asia-Pacific, MEA (Middle East and Africa), Latin America. North America was the largest contributor to the global dried blood spot collection cards market in 2022.

Market Segmentation

By card type: Whatman 903, Ahlstrom 226, FTA, Others

By application: newborn screening (NBS), infectious diseases testing, therapeutic drug monitoring, forensics, CRO/research, others

By region: North America, Europe, Asia-Pacific, MEA (Middle East and Africa), Latin America

The report also provides a detailed analysis of several leading dried blood spot collection cards market vendors that include Ahlstrom-Munksjö Oyj, Danaher Corporation, F. Hoffmann-La Roche AG, PerkinElmer, Inc., Qiagen NV, Shimadzu Corporation, among others. In this report, key players and their strategies are thoroughly analyzed to understand the competitive outlook of the market.

Scope of the Report

To analyze and forecast the market size of the global dried blood spot collection cards market.

To classify and forecast the global dried blood spot collection cards market based on card type, application, region.

To identify drivers and challenges for the global dried blood spot collection cards market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global dried blood spot collection cards market.

To identify and analyze the profile of leading players operating in the global dried blood spot collection cards market.

Why Choose This Report

Gain a reliable outlook of the global dried blood spot collection cards market forecasts from 2023 to 2029 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.
The market estimate for ease of analysis across scenarios in Excel format.
Strategy consulting and research support for three months.
Print authentication provided for the single-user license.

Contents

PART 1. INTRODUCTION

Report description
Objectives of the study
Market segment
Years considered for the report
Currency
Key target audience

PART 2. METHODOLOGY

PART 3. EXECUTIVE SUMMARY

PART 4. MARKET OVERVIEW

Introduction
Drivers
Restraints

PART 5. MARKET BREAKDOWN BY CARD TYPE

Whatman
Ahlstrom
FTA
Others

PART 6. MARKET BREAKDOWN BY APPLICATION

Newborn screening (NBS)
Infectious diseases testing
Therapeutic drug monitoring
Forensics
CRO/research
Others

PART 7. MARKET BREAKDOWN BY REGION

North America

Europe

Asia-Pacific

MEA (Middle East and Africa)

Latin America

PART 8. KEY COMPANIES

Ahlstrom-Munksjö Oyj

Danaher Corporation

F. Hoffmann-La Roche AG

PerkinElmer, Inc.

Qiagen NV

Shimadzu Corporation
