## Abstracts

Dump trucks and mining trucks are heavy-duty vehicles that are designed for hauling and transporting materials. Dump trucks are typically used for transporting loose materials such as gravel, sand, or dirt. They have an open bed that can be raised and tilted to dump the materials at a job site. Mining trucks, on the other hand, are specifically designed for hauling heavy loads in mining and quarrying operations. They are typically much larger and have a higher capacity than dump trucks. According to the latest estimates, the global dump truck and mining truck market is set to achieve an incremental growth of USD 11.9 billion, accelerating at a CAGR of almost 6.25% during the forecast period 2023-2029.
