## Abstracts

E-prescribing, also known as electronic prescribing, is a method of prescribing medication that involves the use of electronic devices, such as computers or smartphones, to transmit prescription orders from healthcare providers to pharmacies. When using e-prescribing, the healthcare provider can quickly and easily access the patient's medication history, which helps to identify potential drug interactions, allergies, or other issues that could cause harm to the patient. This results in increased patient safety and improved health outcomes. E-prescribing also offers improved convenience and efficiency for both the healthcare provider and the patient. Healthcare providers can prescribe medication from any location with an internet connection, and patients can have their prescriptions filled at any pharmacy that accepts electronic prescriptions. This eliminates the need for patients to wait in line at the pharmacy or for healthcare providers to spend time calling in prescriptions, resulting in improved patient satisfaction and faster medication delivery. The global e-prescribing market is likely to register a CAGR of over 23.9% with an incremental growth of USD 6.9 billion during the forecast period 2023-2029.

The report covers market size and growth, segmentation, regional breakdowns, competitive landscape, trends and strategies for global e-prescribing market. It presents a quantitative analysis of the market to enable stakeholders to capitalize on the prevailing market opportunities. The report also identifies top segments for opportunities and strategies based on market trends and leading competitors' approaches.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the product, delivery mode, specialties, end user, usage method, substance, and region. The global market for e-prescribing can be segmented by product: solutions, services. The solutions segment is estimated to account for the largest share of the global e-prescribing market. E-prescribing market is further segmented by delivery mode: web/cloud based, on premise. The web/cloud based

segment held the largest revenue share in 2022. Based on specialties, the e-prescribing market is segmented into: oncology, sports medicines, neurology, cardiovascular, others. Globally, the sports medicines segment made up the largest share of the e-prescribing market. On the basis of end user, the e-prescribing market also can be divided into: hospital, office-based physicians, pharmacy, others. The hospital segment was the largest contributor to the global e-prescribing market in 2022. E-prescribing market by usage method is categorized into: hand-held, computer based devices. The e-prescribing market by substance can be segmented into: controlled, non- controlled. Based on region, the e-prescribing market is further categorized into: North America, Europe, Asia-Pacific, MEA (Middle East and Africa), Latin America.

### Market Segmentation

By product: solutions, services

By delivery mode: web/cloud based, on premise

By specialties: oncology, sports medicines, neurology, cardiovascular, others

By end user: hospital, office-based physicians, pharmacy, others

By usage method: hand-held, computer based devices

By substance: controlled, non- controlled

By region: North America, Europe, Asia-Pacific, MEA (Middle East and Africa), Latin America

The market research report covers the analysis of key stake holders of the global e-prescribing market. Some of the leading players profiled in the report include Allscripts Healthcare Solution Inc., athenahealth, Inc., Cerner Corporation, Epic Systems Corporation, General Electric Company, McKesson Corporation, NextGen Healthcare, Inc., SureScripts LLC, among others. In this report, key players and their strategies are thoroughly analyzed to understand the competitive outlook of the market.

### Scope of the Report

To analyze and forecast the market size of the global e-prescribing market.

To classify and forecast the global e-prescribing market based on product, delivery mode, specialties, end user, usage method, substance, region.

To identify drivers and challenges for the global e-prescribing market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global e-prescribing market.

To identify and analyze the profile of leading players operating in the global e-prescribing market.

### Why Choose This Report

Gain a reliable outlook of the global e-prescribing market forecasts from 2023 to 2029 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.

## Contents

### **PART 1. INTRODUCTION**

Report description  
Objectives of the study  
Market segment  
Years considered for the report  
Currency  
Key target audience

### **PART 2. METHODOLOGY**

### **PART 3. EXECUTIVE SUMMARY**

### **PART 4. MARKET OVERVIEW**

Introduction  
Drivers  
Restraints

### **PART 5. MARKET BREAKDOWN BY PRODUCT**

Solutions  
Services

### **PART 6. MARKET BREAKDOWN BY DELIVERY MODE**

Web/cloud based  
On premise

### **PART 7. MARKET BREAKDOWN BY SPECIALTIES**

Oncology  
Sports medicines  
Neurology  
Cardiovascular  
Others

**PART 8. MARKET BREAKDOWN BY END USER**

Hospital  
Office-based physicians  
Pharmacy  
Others

**PART 9. MARKET BREAKDOWN BY USAGE METHOD**

Hand-held  
Computer based devices

**PART 10. MARKET BREAKDOWN BY SUBSTANCE**

Controlled  
Non- controlled

**PART 11. MARKET BREAKDOWN BY REGION**

North America  
Europe  
Asia-Pacific  
MEA (Middle East and Africa)  
Latin America

**PART 12. KEY COMPANIES**

Allscripts Healthcare Solution Inc.  
athenahealth, Inc.  
Cerner Corporation  
Epic Systems Corporation  
General Electric Company  
McKesson Corporation  
NextGen Healthcare, Inc.  
SureScripts LLC
