Abstracts

Fluids and lubricants are essential in protecting machinery and mechanical components alike from wearing down from friction. The global electric vehicle fluids and lubricants market is projected to rise by USD 2.4 billion by 2028, according to a new report by Gen Consulting Company. It is anticipated to expand at a CAGR of 16.8 percent during the forecast period.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global electric vehicle fluids and lubricants market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the electric vehicle fluids and lubricants industry.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the product, propulsion type, vehicle type, distribution channel, and region. The global market for electric vehicle fluids and lubricants can be segmented by product: brake fluids, drive system fluids, greases, heat transfer fluids. In 2021, the heat transfer fluids segment made up the largest share of revenue generated by the electric vehicle fluids and lubricants market. Electric vehicle fluids and lubricants market is further segmented by propulsion type: battery electric vehicles (BEVs), hybrid electric vehicles (HEVs), plug-in hybrid electric vehicles (PHEVs). Based on vehicle type, the electric vehicle fluids and lubricants market is segmented into: commercial vehicles, passenger vehicles. The passenger vehicles segment is estimated to account for the largest share of the global electric vehicle fluids and lubricants market. On the basis of distribution channel, the electric vehicle fluids and lubricants market also can be divided into: aftermarket, OEMs. The OEMs segment held the largest share of the

global electric vehicle fluids and lubricants market in 2021 and is anticipated to hold its share during the forecast period. Electric vehicle fluids and lubricants market by region is categorized into: Asia Pacific, Europe, North America, Rest of the World (RoW).

By product:

brake fluids

drive system fluids

greases

heat transfer fluids

By propulsion type:

battery electric vehicles (BEVs)

hybrid electric vehicles (HEVs)

plug-in hybrid electric vehicles (PHEVs)

By vehicle type:

commercial vehicles

passenger vehicles

By distribution channel:

aftermarket

OEMs

By region:

Asia Pacific

Europe

North America

Rest of the World (RoW)

The greases market is further segmented into e-motors, bearings, CV joints, others. Among these, the CV joints segment was accounted for the highest revenue generator in 2021. Furthermore, the heat transfer fluids market has been categorized into batteries, e-motors, power electronics, others. The drive system fluids market is further divided into gears, e-motors, others.

The report explores the recent developments and profiles of key vendors in the Global Electric Vehicle Fluids and Lubricants Market, including Afton Chemical Corporation, Castrol Limited, Dober Chemical Corporation, Electrolube Limited, Engineered Fluids Inc., Exxon Mobil Corporation, Fuchs Petrolub SE, Infineum International Limited, Kluber Lubrication NA LP, M&I Materials Limited, Motul S.A., PANOLIN International Inc., Petroliam Nasional Berhad, PolySi Technologies Inc., Royal Dutch Shell plc, The 3M Company, The Lubrizol Corporation, TotalEnergies SE, Valvoline Inc., among others.

Historical & Forecast Period

This research report provides analysis for each segment from 2018 to 2028 considering 2021 to be the base year.

Scope of the Report

To analyze and forecast the market size of the global electric vehicle fluids and lubricants market.

To classify and forecast the global electric vehicle fluids and lubricants market

based on product, propulsion type, vehicle type, distribution channel, region.

To identify drivers and challenges for the global electric vehicle fluids and lubricants market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global electric vehicle fluids and lubricants market.

To identify and analyze the profile of leading players operating in the global electric vehicle fluids and lubricants market.

Why Choose This Report

Gain a reliable outlook of the global electric vehicle fluids and lubricants market forecasts from 2022 to 2028 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.

Contents

PART 1. INTRODUCTION

Report description
Objectives of the study
Market segment
Years considered for the report
Currency
Key target audience

PART 2. METHODOLOGY

PART 3. EXECUTIVE SUMMARY

PART 4. MARKET OVERVIEW

Introduction
Drivers
Restraints
Impact of COVID-19 pandemic

PART 5. MARKET BREAKDOWN BY PRODUCT

Brake fluids
Drive system fluids
Greases
Heat transfer fluids

PART 6. MARKET BREAKDOWN BY PROPULSION TYPE

Battery electric vehicles (BEVs)
Hybrid electric vehicles (HEVs)
Plug-in hybrid electric vehicles (PHEVs)

PART 7. MARKET BREAKDOWN BY VEHICLE TYPE

Commercial vehicles
Passenger vehicles

PART 8. MARKET BREAKDOWN BY DISTRIBUTION CHANNEL

Aftermarket

OEMs

PART 9. MARKET BREAKDOWN BY REGION

Asia Pacific

Europe

North America

Rest of the World (RoW)

PART 10. KEY COMPANIES

Afton Chemical Corporation

Castrol Limited

Dober Chemical Corporation

Electrolube Limited

Engineered Fluids Inc.

Exxon Mobil Corporation

Fuchs Petrolub SE

Infineum International Limited

Kluber Lubrication NA LP

M&I Materials Limited

Motul S.A.

PANOLIN International Inc.

Petroliam Nasional Berhad

PolySi Technologies Inc.

Royal Dutch Shell plc

The 3M Company

The Lubrizol Corporation

TotalEnergies SE

Valvoline Inc.
