Abstracts

The global electric vehicle insulation market is expected to increase by USD 416.1 million, at a compound annual growth rate (CAGR) of 17.3% from 2022 to 2028, according to the latest edition of the Global Electric Vehicle Insulation Market Report.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global electric vehicle insulation market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the electric vehicle insulation industry.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the material, application, propulsion, vehicle type, and region. The global market for electric vehicle insulation can be segmented by material: fiber, foam, mats, others. Globally, the foam segment made up the largest share of the electric vehicle insulation market. Electric vehicle insulation market is further segmented by application: passenger compartment, rear compartment, under the hood and battery pack, others. Based on propulsion, the electric vehicle insulation market is segmented into: battery electric vehicles (BEVs), hybrid electric vehicles (HEVs), plug-in hybrid electric vehicles (PHEVs). HEV held the highest share in the global electric vehicle insulation market. However, the BEV segment is forecast to register the highest CAGR during the forecast period 2022 - 2028. On the basis of vehicle type, the electric vehicle insulation market also can be divided into: commercial vehicle, passenger vehicle. The passenger vehicle segment held the largest revenue share in 2021. Electric vehicle insulation market by region is categorized into: Asia Pacific, Europe, North America, Rest of the World (RoW).

By material:

fiber

foam

mats

others

By application:

passenger compartment

rear compartment

under the hood and battery pack

others

By propulsion:

battery electric vehicles (BEVs)

hybrid electric vehicles (HEVs)

plug-in hybrid electric vehicles (PHEVs)

By vehicle type:

commercial vehicle

passenger vehicle

By region:

Asia Pacific

Europe

North America

Rest of the World (RoW)

The foam market is further segmented into polypropylene (PP) foams, polyurethane (PU) foams, others. The PU foams segment was the largest contributor to the global electric vehicle insulation market in 2021. Furthermore, the fiber market has been categorized into natural fiber, synthetic fiber. The natural fiber segment is estimated to account for the largest share of the global electric vehicle insulation market.

The report also provides a detailed analysis of several leading electric vehicle insulation market vendors that include 3M Company, ADDEV Materials SAS, Adler Pelzer Holding GmbH, Armacell International S.A., Autoneum Holding AG, BASF SE, Compagnie de Saint-Gobain S.A., DuPont de Nemours, Inc., Elmelin Ltd., Illinois Tool Works Inc., Marian, Inc., Morgan Advanced Materials plc, Pyrophobic Systems Ltd., Tecman Speciality Materials Ltd., Unifrax Holding Co., Von Roll Holding AG, Zotefoams Plc, among others.

Historical & Forecast Period

This research report provides analysis for each segment from 2018 to 2028 considering 2021 to be the base year.

Scope of the Report

To analyze and forecast the market size of the global electric vehicle insulation market.

To classify and forecast the global electric vehicle insulation market based on material, application, propulsion, vehicle type, region.

To identify drivers and challenges for the global electric vehicle insulation market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global electric vehicle insulation market.

To identify and analyze the profile of leading players operating in the global electric vehicle insulation market.

Why Choose This Report

Gain a reliable outlook of the global electric vehicle insulation market forecasts from 2022 to 2028 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.

Contents

PART 1. INTRODUCTION

Report description
Objectives of the study
Market segment
Years considered for the report
Currency
Key target audience

PART 2. METHODOLOGY

PART 3. EXECUTIVE SUMMARY

PART 4. MARKET OVERVIEW

Introduction
Drivers
Restraints
Impact of COVID-19 pandemic

PART 5. MARKET BREAKDOWN BY MATERIAL

Fiber
Foam
Mats
Others

PART 6. MARKET BREAKDOWN BY APPLICATION

Passenger compartment
Rear compartment
Under the hood and battery pack
Others

PART 7. MARKET BREAKDOWN BY PROPULSION

Battery electric vehicles (BEVs)

Hybrid electric vehicles (HEVs)
Plug-in hybrid electric vehicles (PHEVs)

PART 8. MARKET BREAKDOWN BY VEHICLE TYPE

Commercial vehicle
Passenger vehicle

PART 9. MARKET BREAKDOWN BY REGION

Asia Pacific
Europe
North America
Rest of the World (RoW)

PART 10. KEY COMPANIES

3M Company
ADDEV Materials SAS
Adler Pelzer Holding GmbH
Armacell International S.A.
Autoneum Holding AG
BASF SE
Compagnie de Saint-Gobain S.A.
DuPont de Nemours, Inc.
Elmelin Ltd.
Illinois Tool Works Inc.
Marian, Inc.
Morgan Advanced Materials plc
Pyrophobic Systems Ltd.
Tecman Speciality Materials Ltd.
Unifrax Holding Co.
Von Roll Holding AG
Zotefoams Plc
