## Abstracts

The global environmental sensing and monitoring market is projected to rise by USD 8 billion by 2028, according to a new report by Gen Consulting Company. It is anticipated to expand at a CAGR of 6.1 percent during the forecast period.

This industry report offers market estimates of the global market, followed by a detailed analysis of the solution, sensor type, sampling method, application, end user, and region. The global market data on environmental sensing and monitoring can be segmented by solution: hardware, services, software. The hardware segment was the largest contributor to the global environmental sensing and monitoring market in 2021. Environmental sensing and monitoring market is further segmented by sensor type: biosensor, chemical sensor, moisture sensor, noise sensor, particulate sensor, temperature sensor. According to the research, the particulate sensor segment had the largest share in the global environmental sensing and monitoring market. Based on sampling method, the environmental sensing and monitoring market is segmented into: active, continuous, passive, others. The continuous segment held the largest revenue share in 2021. On the basis of application, the environmental sensing and monitoring market also can be divided into: air, water, soil, noise, others. Globally, the air segment made up the largest share of the environmental sensing and monitoring market. Environmental sensing and monitoring market by end user is categorized into: agriculture, corporate, energy and utilities, government, healthcare, others. The environmental sensing and monitoring market by region can be segmented into: Asia Pacific, Europe, North America, Rest of the World (RoW).

The global environmental sensing and monitoring market is highly competitive. The report also includes the profiles of leading companies such as 3M Company, ACOEM Group, ams AG, AVTECH Software Inc., Danaher Corp., Honeywell International Inc.,

Horiba Ltd., Merck KGaA, OPTEX GROUP Co. Ltd., PerkinElmer Inc., Robert Bosch GmbH, Sensirion AG, Shimadzu Corp., TE Connectivity Ltd., Teledyne Technologies Inc., Thermo Fisher Scientific Inc., Vaisala Oyj.

The data-centric report focuses on market trends, status and outlook for segments. With comprehensive market assessment across the major geographies, the report is a valuable asset for the existing players, new entrants and the future investors.

Why buy this report?

Get a detailed picture of the Global Environmental Sensing and Monitoring Market

Identify segments/areas to invest in over the forecast period in the Global Environmental Sensing and Monitoring Market

Understand the competitive environment, the market's leading players

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.
