Abstracts

Fuel cards are payment cards specifically designed for fuel purchases and some vehicle maintenance costs. They function similarly to charge cards or credit cards but often provide additional features such as comprehensive real-time reporting. Fuel cards often offer discounts on fuel purchases, which incentivizes drivers or fleet managers to use them instead of credit cards. These discounts can help reduce fuel expenses for businesses and individuals.

The global fuel card market is anticipated to increase by USD 284.7 million till 2029 at an average annual growth of 5.3 percent as per the latest market estimates.
