## Abstracts

Gallate esters are a class of organic compounds that are derived from gallic acid. They are formed by the reaction of gallic acid with an alcohol, such as methanol or ethanol, to produce an ester linkage. Gallate esters are commonly used in the food and beverage industry as natural antioxidants and preservatives. Gallate esters are commonly added to processed foods, such as baked goods, snacks, and oils, to improve their shelf life and prevent oxidation. They are also used in the production of cosmetics and personal care products as a natural preservative and antioxidant.
