Abstracts

A partition wall is a wall that separates rooms, or divides a room. Partition walls are usually not load-bearing. Partition walls are constructed of many materials, including steel panels, bricks, blocks of clay, terra-cotta, concrete, or glass blocks.

Some partition walls are made of sheet glass. Glass partition walls are a series of individual toughened glass panels mounted in wood or metal framing. They may be suspended from or slide along a robust aluminium ceiling track. The system does not require the use of a floor guide, which allows easy operation and an uninterrupted threshold.

The global glass partition production, which measures output worldwide, was expected to reach xx kilo sq.m. in 2016 with an increase of xx% from its year-earlier level. However, the global glass partition market size is estimated to drop from USD xx million in 2011 to USD xx million by 2016, at an estimated CAGR of xx% between 2011 and 2016. The pace of growth is mainly offset by decreased price.

The global glass partition market report profiles some of the key technological developments in the recent times. It also profiles some of the leading players in the market and analyzes their key strategies. The competitive landscape section of the report provides a clear insight into the market share analysis of key industry players. The major players in the global glass partition market are Dorma, Clestra Hauserman, Interwand, Steelcase, Qovans, Lindner Group, Haworth, Maars, Hufcor, Bene, etc.

The global glass partition industry is relatively fragmented, with the market share of Top 10 glass partition producers at xx%.
