Abstracts

Gypsum board is a range of panel products that consists of a noncombustible core, composed primarily of gypsum, as well as paper faces on the surface, back and long edges. Due to its inherent fire resistance, gypsum board is the premier building material for wall, ceiling and partition systems in residential, institutional and commercial structures. When joints and fastener heads are covered by a joint treatment system, gypsum products are designed to provide a monolithic surface that also offers sound control, economy, versatility, quality and convenience. According to the latest research, the global gypsum board market is poised to grow by 6.1 billion square meters during 2023-2029, progressing at a CAGR of 5.9% during the forecast period.
