Abstracts

Heat-assisted magnetic recording (HAMR) is a potential technology which can enable density increases in next generation magnetic hard disk drives. According to the Advanced Storage Technology Consortium (ASTC), HAMR is the next significant storage technology innovation to increase the amount of data storage in the area available to store data-known as the disk's areal density. This boost in areal density will help fuel hard drive product development and growth through the next decade. According to market research study published by Gen Consulting Company, the market size of the global heat-assisted magnetic recording sector is expected to rise by USD 177 million with a CAGR of 36.6% by the end of 2028.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global heat-assisted magnetic recording market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the heat-assisted magnetic recording industry.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the application, and region. The global market for heat-assisted magnetic recording can be segmented by application: laptops, servers, desktop, others. The servers segment captured the largest share of the market in 2021. Heat-assisted magnetic recording market is further segmented by region: North America, Asia Pacific, Europe, Rest of the World (ROW).

By application:

laptops

servers

desktop

others

By region:

North America

Asia Pacific

Europe

Rest of the World (ROW)

The global heat-assisted magnetic recording market is a concentrated industry dominated by only a few players including Seagate Technology Holdings plc, Toshiba Corporation, Western Digital Corporation, among others.

Historical & Forecast Period

This research report provides analysis for each segment from 2018 to 2028 considering 2021 to be the base year.

Scope of the Report

To analyze and forecast the market size of the global heat-assisted magnetic recording market.

To classify and forecast the global heat-assisted magnetic recording market based on application, region.

To identify drivers and challenges for the global heat-assisted magnetic recording market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global heat-assisted magnetic recording market.

To identify and analyze the profile of leading players operating in the global heat-assisted magnetic recording market.

Why Choose This Report

Gain a reliable outlook of the global heat-assisted magnetic recording market forecasts from 2022 to 2028 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.

Contents

PART 1. INTRODUCTION

Report description
Objectives of the study
Market segment
Years considered for the report
Currency
Key target audience

PART 2. METHODOLOGY

PART 3. EXECUTIVE SUMMARY

PART 4. MARKET OVERVIEW

Introduction
Drivers
Restraints
Impact of COVID-19 pandemic

PART 5. MARKET BREAKDOWN BY APPLICATION

Laptops
Servers
Desktop
Others

PART 6. MARKET BREAKDOWN BY REGION

North America
Asia Pacific
Europe
Rest of the World (ROW)

PART 7. KEY COMPANIES

Seagate Technology Holdings plc

Toshiba Corporation

Western Digital Corporation
