Abstracts

High-purity solvents are synthetically distilled organic chemicals with a wide range of applications in industry. The global high purity solvents market is anticipated to reach valuation of ~USD 56,396 million by 2028, representing a CAGR of 5.9% from 2022 to 2028 as per the latest report by Gen Consulting Company.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global high purity solvents market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the high purity solvents industry.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the product, type, application, end user, and region. The global market for high purity solvents can be segmented by product: polar solvent, non-polar solvent. The non-polar solvent segment held the largest revenue share in 2021. High purity solvents market is further segmented by type: GC Grade, HPLC grade, spectrophotometric grade, UHPLC grade, others. Based on application, the high purity solvents market is segmented into: batteries, catalysts, electroplating, liquid crystals, resins, others. On the basis of end user, the high purity solvents market also can be divided into: agricultural, electrical & electronics, food & beverages, laboratories, paints & coatings, personal care & cosmetics, pharmaceuticals & biotechnology, others. According to the research, the paints & coatings segment had the largest share in the global high purity solvents market. High purity solvents market by region is categorized into: North America, Asia Pacific, Europe, Rest of the World (ROW).

By product:

polar solvent

non-polar solvent

By type:

GC Grade

Historical & Forecast Period

This research report provides analysis for each segment from 2018 to 2028 considering 2021 to be the base year.

Scope of the Report

To analyze and forecast the market size of the global high purity solvents market.

To classify and forecast the global high purity solvents market based on product, type, application, end user, region.

To identify drivers and challenges for the global high purity solvents market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global high purity solvents market.

To identify and analyze the profile of leading players operating in the global high purity solvents market.

Why Choose This Report

Gain a reliable outlook of the global high purity solvents market forecasts from 2022 to 2028 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.
