## Abstracts

Hot rolled pickled and oiled (HRPO) is a type of steel product that has been descaled, cleaned, and coated with oil. It is produced from hot-rolled coils and is used for applications that require a cleaner surface and improved mechanical properties. The benefits of using HRPO steel include improved surface quality, increased corrosion resistance, and enhanced formability, weldability, and paintability. The pickling process removes any surface defects, resulting in a smooth surface finish ideal for painting, galvanizing, and other finishing processes. The oil coating also prevents rust formation during storage and transportation. The latest analysis predicts global hot rolled pickled and oiled market will grow from USD 1,494.0 million in 2022 to USD 2,041.3 million by 2029, achieving a CAGR of 4.56 percent, according to the latest edition of the Global Hot Rolled Pickled and Oiled Market Report.
