Abstracts

Gen Consulting Company predicts global inductive proximity sensors market will grow from USD 985 million in 2021 to USD 1,536 million by 2028, achieving a CAGR of 6.5 percent, according to the latest edition of the Global Inductive Proximity Sensors Market Report.

The report covers market size and growth, segmentation, regional breakdowns, competitive landscape, trends and strategies for global inductive proximity sensors market. It traces the market's historic and forecast market growth. The report identifies top segments for opportunities and strategies based on market trends and leading competitors' approaches. This study also provides an analysis of the impact of the COVID-19 crisis on the inductive proximity sensors industry.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the end user, and region. The global market for inductive proximity sensors can be segmented by end user: manufacturing, automotive and transportation, military and aerospace, packaging, others. In 2021, the manufacturing segment made up the largest share of revenue generated by the inductive proximity sensors market. Inductive proximity sensors market is further segmented by region: North America, Europe, Asia-Pacific, MEA (Middle East and Africa), Latin America. Asia-Pacific was the largest contributor to the global inductive proximity sensors market in 2021.

Market Segmentation

By end user: manufacturing, automotive and transportation, military and aerospace, packaging, others

By region: North America, Europe, Asia-Pacific, MEA (Middle East and Africa), Latin

America

The report also provides analysis of the key companies of the industry and their detailed company profiles including Baumer Holding AG, Datalogic SpA, Delta Electronics Inc., Eaton Corporation plc, Hans Turck GmbH and Co. Kg, Honeywell International Inc., Keyence Corporation, Omron Corporation, Panasonic Corporation, Pepperl+Fuchs SE, Rockwell Automation Inc., Sick AG, among others.

Historical & Forecast Period

This research report provides analysis for each segment from 2018 to 2028 considering 2021 to be the base year.

Scope of the Report

To analyze and forecast the market size of the global inductive proximity sensors market.

To classify and forecast the global inductive proximity sensors market based on end user, region.

To identify drivers and challenges for the global inductive proximity sensors market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global inductive proximity sensors market.

To identify and analyze the profile of leading players operating in the global inductive proximity sensors market.

Why Choose This Report

Gain a reliable outlook of the global inductive proximity sensors market forecasts from 2022 to 2028 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.
