## Abstracts

The low temperature co-fired ceramics (LTCC) market is an emerging market with a significant contribution to the global gross domestic product (GDP). The industry is increasingly integrating with the Internet of Things (IoT), 5G, and big data, driving the demand for electronics in various sectors. LTCC technology is primarily being adopted in consumer electronics, automobile electronics, aerospace and military, and other industries.

The growth of the global LTCC market can be attributed to its high adoption by consumers, as well as the automobile and military sectors. The market is segmented based on type, application, and region. This research analyzes the adoption of LTCC in different regions and countries, along with a comparative analysis of alternative options. The advantages offered by LTCC have attracted attention in the global electronics sector, leading to the entry of both existing and new market players. However, the high initial costs and required R&D pose challenges for new entrants.

Glass ceramic composites (GCC) are expected to dominate the LTCC market during the forecast period (2024-2029). The GCC segment market is estimated to reach USD 6.2 billion by 2029, registering a CAGR of 7.3%. The growing adoption of GCC-based LTCC systems can be attributed to the wide range of dielectric constant values they offer, enabling a broad range of applications.

Automotive electronics is expected to dominate the LTCC market, with a projected market size of USD 2.5 billion by 2029, registering a CAGR of 7.1%. The automotive LTCC segment has witnessed significant adoption due to the incorporation of sensors in various parts of vehicles, such as engines, power transmissions, and hydraulic braking units. These sensors are exposed to high temperatures and harsh operating conditions,

leading to performance degradation over time. Therefore, the adoption of LTCC technology becomes necessary in this sector.

In the Asia-Pacific region, the LTCC segment market is expected to reach USD 4.3 billion by 2029, with a CAGR of 7.9%. China dominates the market in this region due to increased demand for electronics. The country has a robust supply chain with numerous market players at each stage and has actively invested in new innovations and research and development (R&D).

This comprehensive industry report provides market estimates and forecasts, accompanied by a detailed examination of the type, end-user, and region aspects. It delivers a quantitative analysis of the market, empowering stakeholders to leverage existing market opportunities. Furthermore, the report identifies key segments for potential opportunities and strategies, drawing insights from market trends and the approaches of leading competitors.

The global baby bottle market has been extensively analyzed by categorizing it according to various sub-segments in order to provide accurate forecasts of industry size and assess trends within specific areas.

The global market for LTCC (low temperature co-fired ceramics) can be segmented by type: glass ceramic composites, glass-bonded ceramics, glass ceramics. Glass ceramic composites was the highest contributor to the global LTCC (low temperature co-fired ceramics) market, with 84.6% share in 2023. Going forward, the glass ceramics segment is projected to witness the highest CAGR during the forecast period.

LTCC (low temperature co-fired ceramics) market is further segmented by end-user: consumer, automotive, aerospace and defense, others. Automotive was the highest contributor to the global LTCC (low temperature co-fired ceramics) market, with 33.7% share in 2023. Going forward, the consumer segment is projected to witness the highest CAGR during the forecast period.

Based on region, the LTCC (low temperature co-fired ceramics) market is segmented into: North America, Europe, Asia-Pacific, MEA (Middle East and Africa), Latin America. Asia-Pacific was the largest revenue contributor to the global ltcc (low temperature co-fired ceramics) market, representing 56.2% of the market in 2023. During the forecast period, Asia-Pacific is projected to witness the highest growth rate.

The report explores the recent developments and profiles of key vendors in the Global

LTCC (Low Temperature Co-fired Ceramics) Market, including Nikko Company, NTK Technologies, Inc., Selmic Oy, Yokowo Co., Ltd., Nanjing Sunlord Electronics Co., Ltd., Adamant Namiki Precision Jewel Co., Ltd., DuPont de Nemours, Inc., KYOCERA Corporation, KOA Corporation, API Technologies Corp., among others. In this report, key players and their strategies are thoroughly analyzed to understand the competitive outlook of the market.

### Why Choose This Report

Gain a reliable outlook of the global LTCC (low temperature co-fired ceramics) market forecasts from 2024 to 2030 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.

Market Segments Covered in Global LTCC (Low Temperature Co-fired Ceramics) Industry Analysis:

#### i.) Type

Glass ceramic composites

Glass-bonded ceramics

Glass ceramics

#### ii.) End-user

Consumer

Automotive

Aerospace and defense

Others

### iii.) Region

North America

Europe

Asia-Pacific

MEA (Middle East and Africa)

Latin America

## Contents

### **PART 1. INTRODUCTION**

- 1.1 Description
- 1.2 Objectives of The Study
- 1.3 Market Segment
- 1.4 Years Considered for The Report
- 1.5 Currency
- 1.6 Key Target Audience

### **PART 2. RESEARCH METHODOLOGY**

- 2.1 Primary Research
- 2.2 Secondary Research

### **PART 3. EXECUTIVE SUMMARY**

### **PART 4. MARKET OVERVIEW**

- 4.1 Introduction
- 4.2 Drivers
- 4.3 Restraints

### **PART 5. GLOBAL LTCC (LOW TEMPERATURE CO-FIRED CERAMICS) MARKET BY TYPE**

- 5.1 Glass ceramic composites
- 5.2 Glass-bonded ceramics
- 5.3 Glass ceramics

### **PART 6. GLOBAL LTCC (LOW TEMPERATURE CO-FIRED CERAMICS) MARKET BY END-USER**

- 6.1 Consumer
- 6.2 Automotive
- 6.3 Aerospace and defense
- 6.4 Others

## **PART 7. GLOBAL LTCC (LOW TEMPERATURE CO-FIRED CERAMICS) MARKET BY REGION**

- 7.1 North America
- 7.2 Europe
- 7.3 Asia-Pacific
- 7.4 MEA (Middle East and Africa)
- 7.5 Latin America

## **PART 8. COMPANY PROFILES**

- 8.1 Nikko Company
- 8.2 NTK Technologies, Inc.
- 8.3 Selmic Oy
- 8.4 Yokowo Co., Ltd,
- 8.5 Nanjing Sunlord Electronics Co., Ltd.
- 8.6 Adamant Namiki Precision Jewel Co., Ltd,
- 8.7 DuPont de Nemours, Inc.
- 8.8 KYOCERA Corporation
- 8.9 KOA Corporation
- 8.10 API Technologies Corp.

**DISCLAIMER**

## I would like to order

Product name: Global LTCC (Low Temperature Co-fired Ceramics) Market 2024

Product link: <https://marketpublishers.com/r/G738CCFA5DE5EN.html>

Price: US\$ 2,250.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
