Abstracts

Medical devices play a crucial role in the diagnosis and treatment of diseases as well as improving the quality of life for people suffering from disabilities. A medical device packaging not only ensures that the device is sterile when delivered to the hospital or healthcare centre, but it must also be easy to open without any particles coming loose. It also has to withstand long storage, often for years, without changed performance. Projected to expand at a CAGR of 6.2% from 2022 to 2028, the global medical device packaging market will worth USD 43,333 million by 2028-end, according to Gen Consulting Company.
