Abstracts

Space-based edge computing refers to the utilization of edge computing technology in space. It involves deploying computing resources closer to the data source, reducing latency and improving real-time data processing capabilities in space applications. The global space-based edge computing market is anticipated to increase by USD 428.3 million till 2029 at an average annual growth of 18.92 percent as per the latest market estimates. The defense sector has witnessed increasing demand for space-based edge computing. The need for low latency and efficient data processing in defense applications drives the adoption of edge computing solutions in space.

The report covers market size and growth, segmentation, regional breakdowns, competitive landscape, trends and strategies for global space-based edge computing market. It presents a quantitative analysis of the market to enable stakeholders to capitalize on the prevailing market opportunities. The report also identifies top segments for opportunities and strategies based on market trends and leading competitors' approaches.

Market Segmentation

Component: hardware, software, service

End user: commercial, defense, civil government

Region: Asia-Pacific, Europe, North America, RoW (Rest of World)

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the component, end user, and region. The global market for space-based edge computing can be segmented by component: hardware, software, service. Globally, the software segment made up the largest share of the space-based edge computing market. Space-based edge computing market is further segmented by

end user: commercial, defense, civil government. The defense segment captured the largest share of the market in 2022. Based on region, the space-based edge computing market is segmented into: Asia-Pacific, Europe, North America, RoW (Rest of World). According to the research, North America had the largest share in the global space-based edge computing market.

Major Companies and Competitive Landscape

The report also provides a detailed analysis of several leading space-based edge computing market vendors that include Exo-Space, Inc., LEOCloud Inc., Loft Orbital Solutions Inc., Nearby Computing, S.L., Satellogic Inc., Skywatch Inc., The Hewlett Packard Enterprise Company (HPE), among others. In this report, key players and their strategies are thoroughly analyzed to understand the competitive outlook of the market.

Scope of the Report

To analyze and forecast the market size of the global space-based edge computing market.

To classify and forecast the global space-based edge computing market based on component, end user, region.

To identify drivers and challenges for the global space-based edge computing market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global space-based edge computing market.

To identify and analyze the profile of leading players operating in the global space-based edge computing market.

Why Choose This Report

Gain a reliable outlook of the global space-based edge computing market forecasts from 2023 to 2029 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.

Contents

PART 1. INTRODUCTION

- 1.1 Description
- 1.2 Objectives of The Study
- 1.3 Market Segment
- 1.4 Years Considered for The Report
- 1.5 Currency
- 1.6 Key Target Audience

PART 2. RESEARCH METHODOLOGY

- 2.1 Primary Research
- 2.2 Secondary Research

PART 3. EXECUTIVE SUMMARY

PART 4. MARKET OVERVIEW

- 4.1 Introduction
- 4.2 Drivers
- 4.3 Restraints

PART 5. GLOBAL MINIMALLY INVASIVE SPINE TECHNOLOGIES MARKET BY CONDITION

- 5.1 Degenerative disc disease
- 5.2 Herniated disc
- 5.3 Spinal fracture
- 5.4 Spinal stenosis
- 5.5 Spine deformity
- 5.6 Spinal infection
- 5.7 Spinal tumor

PART 6. GLOBAL MINIMALLY INVASIVE SPINE TECHNOLOGIES MARKET BY END USER

- 6.1 Hospitals

6.2 Orthopedic clinics

6.3 Ambulatory surgical centers

PART 7. GLOBAL MINIMALLY INVASIVE SPINE TECHNOLOGIES MARKET BY REGION

7.1 Asia-Pacific

7.2 Europe

7.3 North America

7.4 Middle East and Africa (MEA)

7.5 South America

PART 8. COMPANY PROFILES

8.1 Alphatec Holdings, Inc.

8.2 B. Braun SE

8.3 Boston Scientific Corporation

8.4 Globus Medical, Inc.

8.5 Johnson & Johnson

8.6 Medtronic plc

8.7 NuVasive, Inc.

8.8 Orthofix Medical Inc.

8.9 Richard Wolf GmbH

8.10 Stryker Corporation

DISCLAIMER

I would like to order

Product name: Global Minimally Invasive Spine Technologies Market 2023

Product link: <https://marketpublishers.com/r/G88325DBFE5FEN.html>

Price: US\$ 2,750.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
