Abstracts

Magnetic Resonance Imaging (MRI) has become an increasingly essential diagnostic tool in neurosurgery. MRI generates high-resolution images with greater anatomical detail, making it an excellent tool for neurosurgeons. Neurosurgery applications require extremely high-resolution images and ability to differentiate between different types of tissues which MRI excels at. Additionally, MRI is non-invasive, which is especially important when dealing with sensitive areas of the brain. It reduces the need for an invasive surgery to investigate patients with neurological symptoms. According to the latest research, the global MRI in neurosurgery market is poised to grow by USD 33.9 million during 2023-2029, progressing at a CAGR of 5.09% during the forecast period.

The report covers market size and growth, segmentation, regional breakdowns, competitive landscape, trends and strategies for global MRI in neurosurgery market. It presents a quantitative analysis of the market to enable stakeholders to capitalize on the prevailing market opportunities. The report also identifies top segments for opportunities and strategies based on market trends and leading competitors' approaches.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the type, product, end user, and region. The global market for MRI in neurosurgery can be segmented by type: conventional MR imaging devices, robotic-assisted MR imaging devices. According to the research, the conventional MR imaging devices segment had the largest share in the global MRI in neurosurgery market. MRI in neurosurgery market is further segmented by product: systems, instruments and accessories. In 2022, the systems segment made up the largest share of revenue generated by the MRI in neurosurgery market. Based on end user, the MRI in neurosurgery market is segmented into: hospitals, ambulatory surgery centers, others. Among these, the hospitals segment was accounted for the highest revenue generator in 2022. On the basis of region, the MRI in neurosurgery market also can be

divided into: North America, Europe, Asia-Pacific, Rest of the World (RoW).
North America captured the largest share of the market in 2022.

Market Segmentation

By type: conventional MR imaging devices, robotic-assisted MR imaging devices

By product: systems, instruments and accessories

By end user: hospitals, ambulatory surgery centers, others

By region: North America, Europe, Asia-Pacific, Rest of the World (RoW)

The report explores the recent developments and profiles of key vendors in the Global MR Imaging in Neurosurgery Market, including Siemens AG, General Electric Company, Koninklijke Philips N.V., Canon Medical Systems Corporation, Brainlab AG, Esaote SpA, Fonar Corporation, Fujifilm Holdings Corporation, Medtronic plc, Zimmer Biomet Holdings, Inc., among others. In this report, key players and their strategies are thoroughly analyzed to understand the competitive outlook of the market.

Scope of the Report

To analyze and forecast the market size of the global MRI in neurosurgery market.

To classify and forecast the global MRI in neurosurgery market based on type, product, end user, region.

To identify drivers and challenges for the global MRI in neurosurgery market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global MRI in neurosurgery market.

To identify and analyze the profile of leading players operating in the global MRI in neurosurgery market.

Why Choose This Report

Gain a reliable outlook of the global MRI in neurosurgery market forecasts from 2023 to 2029 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.

Contents

PART 1. INTRODUCTION

Report description
Objectives of the study
Market segment
Years considered for the report
Currency
Key target audience

PART 2. METHODOLOGY

PART 3. EXECUTIVE SUMMARY

PART 4. MARKET OVERVIEW

Introduction
Drivers
Restraints

PART 5. MARKET BREAKDOWN BY TYPE

Conventional MR imaging devices
Robotic-assisted MR imaging devices

PART 6. MARKET BREAKDOWN BY PRODUCT

Systems
Instruments and accessories

PART 7. MARKET BREAKDOWN BY END USER

Hospitals
Ambulatory surgery centers
Others

PART 8. MARKET BREAKDOWN BY REGION

North America

Europe

Asia-Pacific

Rest of the World (RoW)

PART 9. KEY COMPANIES

Siemens AG

General Electric Company

Koninklijke Philips N.V.

Canon Medical Systems Corporation

Brainlab AG

Esaote SpA

Fonar Corporation

Fujifilm Holdings Corporation

Medtronic plc

Zimmer Biomet Holdings, Inc.

DISCLAIMER

I would like to order

Product name: Global MR Imaging in Neurosurgery Market 2023-2029

Product link: <https://marketpublishers.com/r/G786B7B3CA7BEN.html>

Price: US\$ 2,750.00 (Single User License / Electronic Delivery)
