Abstracts

Dicyclohexylmethane-4,4'-diisocyanate, or hydrogenated MDI (HMDI) serves as a building block for the preparation of chemical products, reactive intermediates and polymers such as polyurethane dispersions (PUDs), elastomers, and thermoplastic polyurethanes (TPUs). Products based on HMDI may be useful in coatings for flooring, roofing, textiles, elastomers, optical products, adhesives, and sealants. Geographically, Europe has been a leading market for HMDI in terms of market demand and is anticipated to have its dominance over the forecast period. However, Asia-Pacific HMDI market is expected to growing at the fastest rate owing to rising demand and production of automobiles, middle class population explosion, flexible finance options, better quality of living and expanding trade ventures in the emerging markets.

The report covers forecast and analysis for the HMDI market on a global and regional level. The study provides historic data of 2012-2016 along with a forecast from 2017 to 2022 based on both volumes and revenue. The study includes drivers and restraints for the HMDI market along with the impact they have on the demand over the forecast period. Additionally, the report includes the study of opportunities available in the HMDI market on a global level.
