Abstracts

According to the latest data, the market size of the global nicotine gums sector is expected to rise by USD 0.5 billion with a CAGR of 4.76% by the end of 2029. Nicotine gum is a type of chewing gum that contains nicotine as an active ingredient. It is used as a smoking cessation aid to help individuals quit smoking by reducing withdrawal symptoms such as cravings, irritability, and anxiety. Nicotine gum works by releasing nicotine into the bloodstream through the lining of the mouth. When an individual chews the gum, the nicotine is absorbed through the tissues in the mouth and enters the bloodstream, providing a temporary relief from withdrawal symptoms. Nicotine gum is a type of chewing gum that contains nicotine as an active ingredient. It is used as a smoking cessation aid to help individuals quit smoking by reducing withdrawal symptoms such as cravings, irritability, and anxiety. Nicotine gum works by releasing nicotine into the bloodstream through the lining of the mouth. When an individual chews the gum, the nicotine is absorbed through the tissues in the mouth and enters the bloodstream, providing a temporary relief from withdrawal symptoms.

The report covers market size and growth, segmentation, regional breakdowns, competitive landscape, trends and strategies for global nicotine gums market. It presents a quantitative analysis of the market to enable stakeholders to capitalize on the prevailing market opportunities. The report also identifies top segments for opportunities and strategies based on market trends and leading competitors' approaches.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the type, category, distribution channel, and region. The global market for nicotine gums can be segmented by type: 2 MG, 4 MG. Among these, the 2 MG segment was accounted for the highest revenue generator in 2022. Nicotine gums market is further segmented by category: flavored, plain. The flavored segment is estimated to account for the largest share of the global nicotine gums market. Based on

distribution channel, the nicotine gums market is segmented into: store-based, non-store-based. The store-based segment held the largest share of the global nicotine gums market in 2022 and is anticipated to hold its share during the forecast period. On the basis of region, the nicotine gums market also can be divided into: North America, Europe, Asia-Pacific, Rest of the World (RoW). In 2022, North America made up the largest share of revenue generated by the nicotine gums market.

The store-based market is further segmented into supermarkets and hypermarkets, pharmacies & drug stores, others. The supermarkets and hypermarkets segment captured the largest share of the market in 2022 and is expected to maintain its dominance during the forecast period.

Market Segmentation

By type: 2 MG, 4 MG

By category: flavored, plain

By distribution channel: store-based, non-store-based

By region: North America, Europe, Asia-Pacific, Rest of the World (RoW)
