Abstracts

Pet grooming refers to the act of bathing, brushing, clipping, or styling a pet, trimming a pet's nails, or providing anal gland expression. Regularly pet grooming allows people to catch any underlying diseases or conditions early, meaning that they will be able to be treated quicker and more efficiently and will therefore be less likely to have any lasting effect on pet. According to market research study published by Gen Consulting Company, the market size of the global pet grooming products sector is expected to rise by USD 6 billion with a CAGR of 7.7% by the end of 2028.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global pet grooming products market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the pet grooming products industry.
