Abstracts

Pet hair care is essential not only for cosmetic purposes but also for the overall health and cleanliness of domestic animals. Proper care and grooming of a pet's coat help prevent specific health problems related to ticks, fleas, dry patches, and issues with their nails, teeth, ears, and eyes, such as infection or inflammation. Regular hair care, such as brushing, can also reveal signs of illness or injury. Dogs are the primary beneficiaries of pet hair care, followed by cats. The growth of the pet hair care market is driven by the increasing adoption of pets, rise in hair problems, and the growing need for natural products and product innovations.

The shampoo segment of the pet hair care market is estimated at USD 1.6 billion in 2023, and it is expected to reach USD 2.4 billion by 2029, registering a CAGR of 6.4% during the forecast period. Similar to hair care in humans, pet hair care involves various aspects such as safety, effective flea and tick care, hair softening formulas, and efficacy. However, it also carries risks such as allergies and side effects, including internal organ and skin damage. Consequently, shampoos have emerged as essential products that keep pets clean and hygienic, maintaining the shine and brightness of their coats while preventing common skin problems related to germs, fleas, and ticks. These factors are anticipated to drive the demand for shampoos.

The dog hair care market is estimated at USD 1.8 billion in 2023, and it is expected to reach USD 2.6 billion by 2029, with a CAGR of 5.1% during the forecast period. However, the cat hair care segment is expected to witness the fastest growth. This can be attributed to the increasing adoption of cats worldwide and the growing demand for pet care products, which will drive the overall pet hair care market.

The supermarket and hypermarket distribution channel segment of the pet hair care market is estimated at USD 1.2 billion in 2023, and it is expected to reach USD 1.8 billion by 2029, with a CAGR of 6.5% during the forecast period. Supermarkets are

advanced stores that cater to the household needs of consumers. They display various products in their respective departments to catch the attention of customers and allow them to choose merchandise based on their preferences and needs. The supermarket and hypermarket segment is expected to witness substantial growth as they offer a one-stop shopping experience with a broad range of products.

The North America pet hair care market is estimated at USD 1.5 billion in 2023, and it is expected to reach USD 2.2 billion by 2029, with a CAGR of 6.4% during the forecast period. The rising adoption of pets and increasing per capita animal healthcare expenditure are major factors expected to contribute to the United States retaining its large market share. In recent years, people have been willing to spend more on premium products for their companion animals, leading to an increase in spending on pet humanization globally. This factor is also expected to drive the demand for pet hair care products in the near future.

This comprehensive industry report provides market estimates and forecasts, accompanied by a detailed examination of the product type, animal type, distribution channel, and region aspects. It delivers a quantitative analysis of the market, empowering stakeholders to leverage existing market opportunities. Furthermore, the report identifies key segments for potential opportunities and strategies, drawing insights from market trends and the approaches of leading competitors.

The global baby bottle market has been extensively analyzed by categorizing it according to various sub-segments in order to provide accurate forecasts of industry size and assess trends within specific areas.

The global market for pet hair care can be segmented by product type: shampoos, conditioners, shedding and trimming tools, other. Shampoos held the highest share in the global pet hair care market. However, the other segment is forecast to register the highest CAGR during the forecast period 2024 %li%2030.
