## Abstracts

Pigment dispersions are dry pigments dispersed in liquid material that are stabilized using resins or surfactants/additives to minimize reagglomeration, a phenomenon where the pigments come back together to form lumps. They can contain water, solvent, or based on a resin that is liquid at room temperature. Pigment dispersions often have relatively high pigment concentrations and are used in additive quantities to impart color in a wide variety of products. According to latest analysis by Gen Consulting Company, the global pigment dispersions market is projected to climb to USD 25,262 million by 2028-end, progressing at a CAGR of 4.1% during 2022-2028.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global pigment dispersions market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the pigment dispersions industry.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the product, application, and region. The global market for pigment dispersions can be segmented by product: organic pigment dispersions, inorganic pigment dispersions. Pigment dispersions market is further segmented by application: plastics, inks, paint and coatings, others. Based on region, the pigment dispersions market is segmented into: Asia Pacific, Europe, North America, Rest of the World (RoW).

By product:

organic pigment dispersions

inorganic pigment dispersions

By application:

plastics

inks

paint and coatings

others

By region:

Asia Pacific

Europe

North America

Rest of the World (RoW)

The report also provides analysis of the key companies of the industry and their detailed company profiles including Altana AG, BASF SE, Clariant AG, Ferro Corporation, Heidelberger Druckmaschinen AG, Pidilite Industries Limited, Solvay S.A., Sun Chemical Corporation (DIC Corporation), among others.

Historical & Forecast Period

This research report provides analysis for each segment from 2018 to 2028 considering 2021 to be the base year.

Scope of the Report

To analyze and forecast the market size of the global pigment dispersions

market.

To classify and forecast the global pigment dispersions market based on product, application, region.

To identify drivers and challenges for the global pigment dispersions market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global pigment dispersions market.

To identify and analyze the profile of leading players operating in the global pigment dispersions market.

### Why Choose This Report

Gain a reliable outlook of the global pigment dispersions market forecasts from 2022 to 2028 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.
