Abstracts

Polyol sweeteners are commonly used in sugar-free and low-calorie products like chewing gum, candies, and baked goods because they provide a sweet taste without contributing as many calories as regular sugar. Some common types of polyol sweeteners include xylitol, sorbitol, erythritol, and maltitol. In addition to providing a sweet taste, polyol sweeteners also have other functional benefits such as helping to preserve the texture and shelf-life of food products. They are also less likely to cause blood sugar spikes and insulin releases compared to regular sugar, making them a good option for people with diabetes. The global polyol sweeteners market is likely to register a CAGR of over 6.26% with an incremental growth of USD 2.9 billion during the forecast period 2023-2029.
