Abstracts

Refurbished medical equipment refers to devices that have been restored to a reusable condition without changing their original specifications. These devices are thoroughly tested for quality and function and, if necessary, parts are replaced or repaired. Then the devices are cleaned and the data is deleted. The software is updated to the latest version. By some estimates, buying refurbished devices can reduce medical equipment costs by 20-30%. That's extremely appealing to decision-makers feeling the pressure of lean capital budgets. The global refurbished medical equipment market is anticipated to increase by USD 5.5 billion till 2029 at an average annual growth of 6.1 percent as per the latest report by Gen Consulting Company.
