## Abstracts

Satellite Electric Propulsion (SEP) is a form of propulsion system used in satellites that involves the use of electrically charged particles to produce thrust. Because SEP uses less fuel and producing low-thrust, satellites equipped with SEP engines can spend more time in orbit, which translates to longer operational life of the satellites. This reduces the need for expensive replacements, reduces waste, and maximizes mission performance. According to the latest estimates, the global satellite electric propulsion market is set to achieve an incremental growth of USD 127.8 million, accelerating at a CAGR of almost 2.83% during the forecast period 2023-2029.

The report covers market size and growth, segmentation, regional breakdowns, competitive landscape, trends and strategies for global satellite electric propulsion market. It presents a quantitative analysis of the market to enable stakeholders to capitalize on the prevailing market opportunities. The report also identifies top segments for opportunities and strategies based on market trends and leading competitors' approaches.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the mass class, mission type, component, mission application, and region. The global market for satellite electric propulsion can be segmented by mass class: large satellite (above 2,201 kg), medium satellite (501-2,200 kg), small satellite (0-500 kg). The small satellite (0-500 kg) segment held the largest share of the global satellite electric propulsion market in 2022 and is anticipated to hold its share during the forecast period. Satellite electric propulsion market is further segmented by mission type: propulsion chamber/nozzle, power control units, power distribution units, pointing mechanism, pressure regulators, valves, flow controllers, mass flow sensors, pressure transducers, particle filters, tanks, plumbing/tuning. Globally, the propulsion chamber/nozzle segment made up the largest share of the satellite electric propulsion market. Based on component, the satellite electric propulsion market is segmented into:

technology development, communication, earth observation, others. The communication segment was the largest contributor to the global satellite electric propulsion market in 2022. On the basis of mission application, the satellite electric propulsion market also can be divided into: orbit raising, station keeping. The station keeping segment is estimated to account for the largest share of the global satellite electric propulsion market. Satellite electric propulsion market by region is categorized into: North America, Europe, Asia-Pacific, Rest of the World (RoW).

### Market Segmentation

By mass class: large satellite (above 2,201 kg), medium satellite (501-2,200 kg), small satellite (0-500 kg)

By mission type: propulsion chamber/nozzle, power control units, power distribution units, pointing mechanism, pressure regulators, valves, flow controllers, mass flow sensors, pressure transducers, particle filters, tanks, plumbing/tuning

By component: technology development, communication, earth observation, others

By mission application: orbit raising, station keeping

By region: North America, Europe, Asia-Pacific, Rest of the World (RoW)

The report also provides a detailed analysis of several leading satellite electric propulsion market vendors that include Airbus SE, ArianeGroup, Astra Space Inc., Busek, Co. Inc., ENPULSION GmbH, Orbion Space Technology Inc., among others. In this report, key players and their strategies are thoroughly analyzed to understand the competitive outlook of the market.

**\*REQUEST FREE SAMPLE TO GET A COMPLETE LIST OF COMPANIES**

### Scope of the Report

To analyze and forecast the market size of the global satellite electric propulsion market.

To classify and forecast the global satellite electric propulsion market based on mass class, mission type, component, mission application, region.

To identify drivers and challenges for the global satellite electric propulsion market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global satellite electric propulsion market.

To identify and analyze the profile of leading players operating in the global satellite electric propulsion market.

### Why Choose This Report

Gain a reliable outlook of the global satellite electric propulsion market forecasts from 2023 to 2029 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.

## Contents

### **PART 1. INTRODUCTION**

Report description  
Objectives of the study  
Market segment  
Years considered for the report  
Currency  
Key target audience

### **PART 2. METHODOLOGY**

### **PART 3. EXECUTIVE SUMMARY**

### **PART 4. MARKET OVERVIEW**

Introduction  
Drivers  
Restraints

### **PART 5. MARKET BREAKDOWN BY MASS CLASS**

Large satellite (above 2,201 kg)  
Medium satellite (501-2,200 kg)  
Small satellite (0-500 kg)

### **PART 6. MARKET BREAKDOWN BY MISSION TYPE**

Propulsion chamber/nozzle  
Power control units  
Power distribution units  
Pointing mechanism  
Pressure regulators  
Valves  
Flow controllers  
Mass flow sensors  
Pressure transducers  
Particle filters

Tanks  
Plumbing/tuning

## **PART 7. MARKET BREAKDOWN BY COMPONENT**

Technology development  
Communication  
Earth observation  
Others

## **PART 8. MARKET BREAKDOWN BY MISSION APPLICATION**

Orbit raising  
Station keeping

## **PART 9. MARKET BREAKDOWN BY REGION**

North America  
Europe  
Asia-Pacific  
Rest of the World (RoW)

## **PART 10. KEY COMPANIES**

Airbus SE  
ArianeGroup  
Astra Space Inc.  
Busek, Co. Inc.  
ENPULSION GmbH  
Orbion Space Technology Inc.

## **DISCLAIMER**

## I would like to order

Product name: Global Satellite Electric Propulsion Market 2023-2029

Product link: <https://marketpublishers.com/r/GD5A20DDACBDEN.html>

Price: US\$ 2,850.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

[info@marketpublishers.com](mailto:info@marketpublishers.com)

## Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/GD5A20DDACBDEN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:

First name:  
Last name:  
Email:  
Company:  
Address:  
City:  
Zip code:  
Country:  
Tel:  
Fax:
