Abstracts

A sensor is a tiny device or module that analyzes its surroundings and reports the quantitative measure to the processor. From face unlock and fingerprint reader to GPS and auto-brightness, smartphone relies on numerous specialized sensors to allow people to use the apps, features, and services. According to latest analysis by Gen Consulting Company, the global smartphone sensor market is poised to grow by USD 27 billion during 2022-2028, progressing at a CAGR of 5.5% during the forecast period.

This industry report offers market estimates of the global market, followed by a detailed analysis of the product, application, and region. The global market data on smartphone sensor can be segmented by product: accelerometer, biometric sensor, GPS, gyroscope, image sensor, proximity sensor, others. The image sensor segment held the largest revenue share in 2021. Smartphone sensor market is further segmented by application: rugged smartphone, smartwatches, standard smartphone, others. Among these, the standard smartphone segment was accounted for the highest revenue generator in 2021. Based on region, the smartphone sensor market is segmented into: Asia Pacific, Europe, North America, Rest of the World (RoW).

The global smartphone sensor market is highly competitive. The report also includes the profiles of leading companies such as ams AG, Broadcom Inc., Maxim Integrated, Murata Manufacturing Co. Ltd., Omron Corporation, Panasonic Corporation, Samsung Electronics Co. Ltd., Sony Corporation, STMicroelectronics N.V., Vishay Intertechnology Inc.

The data-centric report focuses on market trends, status and outlook for segments. With comprehensive market assessment across the major geographies, the report is a valuable asset for the existing players, new entrants and the future investors.
