## Abstracts

A snow blower or snow thrower is a machine for removing snow from an area where it is not wanted, such as a driveway, sidewalk, roadway, railroad track, ice rink, or runway. The misnomer "snow blower" is often used, as the snow is moved using an auger or impeller instead of blowing it. It can use either electric power (line power or battery), or a gasoline or diesel engine to throw snow to another location or into a truck to be hauled away. This is in contrast with the action of snow plows, which push snow to the front or side.

The report covers forecast and analysis for the snow blower market on a global and regional level. The study provides historic data of 2012-2016 along with a forecast from 2017 to 2022 based on both volumes and revenue. The study includes drivers and restraints for the snow blower market along with the impact they have on the demand over the forecast period. Additionally, the report includes the study of opportunities available in the snow blower market on a global level.

The report has been prepared based on the synthesis, analysis, and interpretation of information about the global snow blower market collected from specialized sources. The competitive landscape section of the report provides a clear insight into the market share analysis of key industry players.
