## Abstracts

Solid phase extraction (SPE) is a sample preparation technique routinely used in analytical laboratories for the extraction of analytes from a complex matrix. This sample preparation technique enables the extraction, cleanup and concentration of analytes prior to their quantification. SPE can be used to isolate analytes of interest from a wide variety of matrices, including urine, blood, water, beverages, soil, and animal tissue. The global solid phase extraction market is likely to register a CAGR of over 5.5% with an incremental growth of USD 132 million during the forecast period 2022-2028.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global solid phase extraction market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the solid phase extraction industry.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the product, application, and region. The global market for solid phase extraction can be segmented by product: SPE cartridge, SPE disk, others. The SPE disk segment is estimated to account for the largest share of the global solid phase extraction market. Solid phase extraction market is further segmented by application: academic & research institutes, environmental, hospitals & clinics, pharmaceuticals, others. The pharmaceuticals segment held the largest revenue share in 2021. Based on region, the solid phase extraction market is segmented into: North America, Asia Pacific, Europe, Rest of the World (ROW).

By product:

SPE cartridge

SPE disk

others

By application:

academic & research institutes

environmental

hospitals & clinics

pharmaceuticals

others

By region:

North America

Asia Pacific

Europe

Rest of the World (ROW)

The market research report covers the analysis of key stake holders of the global solid phase extraction market. Some of the leading players profiled in the report include Agilent Technologies, Inc., Biotage AB, Gerstel GmbH & Co. KG, Gilson Incorporated, GL Sciences Inc., Merck KGaA, Pall Corporation (Danaher Corporation), PerkinElmer, Inc., Phenomenex Inc., Tecan Group Ltd., The 3M Company, Thermo Fisher Scientific Inc., Waters Corporation, among others.

Historical & Forecast Period

*Global Solid Phase Extraction (SPE) Market 2022-2028*

This research report provides analysis for each segment from 2018 to 2028 considering 2021 to be the base year.

### Scope of the Report

To analyze and forecast the market size of the global solid phase extraction market.

To classify and forecast the global solid phase extraction market based on product, application, region.

To identify drivers and challenges for the global solid phase extraction market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global solid phase extraction market.

To identify and analyze the profile of leading players operating in the global solid phase extraction market.

### Why Choose This Report

Gain a reliable outlook of the global solid phase extraction market forecasts from 2022 to 2028 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.
