Abstracts

Squalene is a high-end, oil-free moisturizing ingredient used in many cosmetics that, until recently, was extracted primarily from the liver of deep sea sharks. Squalene is quickly absorbed into the skin without leaving an oily residue and also mixes well with other oils, which will augment its demand in personal care and cosmetic products. Squalene is also used in the manufacture of vaccines.

The report covers forecast and analysis for the squalene market on a global and regional level. The study provides historic data of 2012-2016 along with a forecast from 2017 to 2022 based on both volumes and revenue. The study includes drivers and restraints for the squalene market along with the impact they have on the demand over the forecast period.
