Abstracts

Space carbon fiber composites are materials used in the aerospace industry, specifically in space applications. These composites are made from carbon fibers, which are known for their high strength-to-weight ratio and resistance to fatigue and corrosion. Space carbon fiber composites are used to create lightweight and durable structures for satellites, launch vehicles, and deep space exploration missions.

The global space carbon fiber composite market size is projected to grow by USD 418.6 million from 2023 to 2029, registering a CAGR of 14.59 percent, according to the latest market data. The market for space carbon fiber composites is witnessing a significant surge due to the increasing demand for small satellites that possess a lightweight profile for communication and Earth observation applications. These composites offer the essential strength and structural integrity required while minimizing the weight of satellites.

Moreover, the growth of the commercial space sector has acted as a major catalyst behind the escalating demand for space carbon fiber composites. Leading companies such as SpaceX and Blue Origin are spearheading this flourishing sector, driving the need for lightweight and high-strength materials for reusable launch vehicles and other advanced space technologies. As the commercial space industry continues to expand rapidly, the demand for space carbon fiber composites is projected to soar even higher.

The report covers market size and growth, segmentation, regional breakdowns, competitive landscape, trends and strategies for global space carbon fiber composite market. It presents a quantitative analysis of the market to enable stakeholders to capitalize on the prevailing market opportunities. The report also identifies top segments for opportunities and strategies based on market trends and leading competitors' approaches.

Market Segmentation

Raw material: PAN-based, pitch-based

Tensile modulus: ultrahigh modulus, high-modulus

Application: satellites, launch vehicles, deep space exploration

Manufacturing process: automated fiber placement (ATL/AFP), compression molding, additive manufacturing

End user: commercial, defense

Region: Asia-Pacific, Europe, North America, RoW (Rest of World)

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the raw material, tensile modulus, application, manufacturing process, end user, and region. The global market for space carbon fiber composite can be segmented by raw material: PAN-based, pitch-based. The PAN-based segment held the largest revenue share in 2022. Space carbon fiber composite market is further segmented by tensile modulus: ultrahigh modulus, high-modulus. Among these, the high-modulus segment was accounted for the highest revenue generator in 2022. Based on application, the space carbon fiber composite market is segmented into: satellites, launch vehicles, deep space exploration. The launch vehicles segment captured the largest share of the market in 2022. On the basis of manufacturing process, the space carbon fiber composite market also can be divided into: automated fiber placement (ATL/AFP), compression molding, additive manufacturing. According to the research, the compression molding segment had the largest share in the global space carbon fiber composite market. Space carbon fiber composite market by end user is categorized into: commercial, defense. The commercial segment held the largest revenue share in 2022. The space carbon fiber composite market by region can be segmented into: Asia-Pacific, Europe, North America, RoW (Rest of World). Among these, North America was accounted for the highest revenue generator in 2022.

Major Companies and Competitive Landscape

The report has also analyzed the competitive landscape of the global space carbon fiber composite market with some of the key players being Calian Group Ltd., Hexcel Corporation, Mitsubishi Chemical Corporation, Oxeon AB, Redwire Corporation, RUAG Holding Ltd., SGL Carbon SE, Solvay S.A., Teijin Limited, Toray TCAC Holding B.V., among others. In this report, key players and their strategies are thoroughly analyzed to understand the competitive outlook of the market.

Scope of the Report

To analyze and forecast the market size of the global space carbon fiber composite market.

To classify and forecast the global space carbon fiber composite market based on raw material, tensile modulus, application, manufacturing process, end user, region.

To identify drivers and challenges for the global space carbon fiber composite market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global space carbon fiber composite market.

To identify and analyze the profile of leading players operating in the global space carbon fiber composite market.

Why Choose This Report

Gain a reliable outlook of the global space carbon fiber composite market forecasts from 2023 to 2029 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.

Contents

PART 1. INTRODUCTION

- 1.1 Description
- 1.2 Objectives of The Study
- 1.3 Market Segment
- 1.4 Years Considered for The Report
- 1.5 Currency
- 1.6 Key Target Audience

PART 2. RESEARCH METHODOLOGY

- 2.1 Primary Research
- 2.2 Secondary Research

PART 3. EXECUTIVE SUMMARY

PART 4. MARKET OVERVIEW

- 4.1 Introduction
- 4.2 Drivers
- 4.3 Restraints

PART 5. GLOBAL STAGE LIGHTING MARKET BY PRODUCT

- 5.1 Lighting fixtures
- 5.2 Lighting control systems

PART 6. GLOBAL STAGE LIGHTING MARKET BY LIGHTING FIXTURES

- 6.1 Fixture movement
- 6.2 Lighting source

PART 7. GLOBAL STAGE LIGHTING MARKET BY APPLICATION

- 7.1 Concerts
- 7.2 Corporate events
- 7.3 Weddings/events

- 7.4 Architectural and commercial installs
- 7.5 Broadcast
- 7.6 Hospitality
- 7.7 Others

PART 8. GLOBAL STAGE LIGHTING MARKET BY END USER

- 8.1 Touring rental
- 8.2 Fixed installation

PART 9. GLOBAL STAGE LIGHTING MARKET BY REGION

- 9.1 Asia-Pacific
- 9.2 Europe
- 9.3 North America
- 9.4 Middle East and Africa (MEA)
- 9.5 South America

PART 10. COMPANY PROFILES

- 10.1 Acuity Brands, Inc.
- 10.2 Eaton Corporation plc
- 10.3 Guangzhou Haoyang Electronic Co., Ltd.
- 10.4 Harman International Industries Inc.
- 10.5 Kumho Electric, Inc.
- 10.6 OSRAM Licht AG
- 10.7 Shenzhen Absen Optoelectronic Co., Ltd.
- 10.8 Signify N.V.
- 10.9 Ushio, Inc.
- 10.10 Zumtobel Group AG

DISCLAIMER

I would like to order

Product name: Global Stage Lighting Market 2023

Product link: <https://marketpublishers.com/r/GFDDbfd51206en.html>

Price: US\$ 3,350.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/GFDDbfd51206en.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:
