Abstracts

Stone paper is a type of paper made from calcium carbonate, also known as limestone, and a small amount of resin. It is a more environmentally friendly alternative to traditional paper, as it does not require the use of trees in the production process. Stone paper is also more durable and waterproof than traditional paper, which makes it ideal for certain applications such as outdoor signage or packaging. However, it can be more expensive than traditional paper due to the production process and materials used. The global stone paper market was estimated at USD 835.0 million in 2022 and is expected to hit USD 1,208.2 million by 2029, registering a CAGR of 5.42% from 2023 to 2029 as per the latest market estimates.
