Abstracts

The surgical microscope, a critical component of modern surgical facilities, plays an essential role in the success of today's most sophisticated and demanding surgical procedures. The development of this vital surgical tool represents centuries of progress in understanding the principles of optics and vision, culminating in the reduction of spherical and chromatic aberrations in compound microscopes. In the late nineteenth century, several manufacturers brought the compound microscope into the contemporary era of commercial design and manufacture. The growing market for surgical microscopes can be primarily attributed to the increasing prevalence and incidence of chronic disorders globally, as well as improving healthcare infrastructure that requires advanced technologies and better reimbursement frameworks in emerging countries.

Conventional microscopes, also known as surgical or operating microscopes, are designed for use in surgical procedures, typically microscopic surgeries. These optical instruments offer high-quality, stereoscopic, illuminated, and magnified images of the surgical area to the surgeon or user. The conventional microscopes segment is estimated to reach USD 2.0 billion by 2029, registering a CAGR of 10.2% during the forecast period, with a current market size of USD 1.0 billion in 2023. Advanced microscopes, also known as exoscopic systems, are developed as an alternative to conventional microscopes, offering surgical field illumination and magnification with high-definition 2D or 3D images. The main feature of an exoscope is to provide high-quality illumination at depth and a broad surgical field during the surgical procedure. The advanced microscopes segment is expected to grow at a higher CAGR during the forecast period 2024-2029. As of 2023, the largest share of the market was held by the ENT segment, generating revenue of USD 365 million. It is expected to reach USD 744 million by 2029, registering a CAGR of 10.7%. Microsurgery in otolaryngology (ENT) requires high-quality imaging and visualization. Microscopes for otolaryngology allow professionals to perform sophisticated and minimally invasive ENT surgical operations

with high precision, resulting in the best therapeutic outcomes. ENT specialists use ENT microscopes to visualize the surgical site and perform various surgical operations with clearer and more detailed images.

The global surgical microscopes market (by end user) was dominated by the hospitals segment in 2023, with a market size of USD 1012 million, expected to reach USD 2196 million by 2029, with a CAGR of 11.7% during the forecast period. Novel surgical microscopes are being used across various surgical settings due to the rising prevalence of chronic diseases and increasing demand for sophisticated healthcare infrastructure. The rising prevalence of chronic disorders globally, improving healthcare infrastructure, and presence of various products for the segment is anticipated to propel the overall growth of the market. North America, followed by Europe, held the major share of the global market (in terms of value) in 2023, with the North America market estimated to reach USD 1036 million by 2029, registering a CAGR of 12.2% during the forecast period, with a current market size of USD 463 million in 2023. The North America region has a large base of early adopters and is expected to remain the leading market for surgical microscopes. Many leading companies in the market are headquartered in this region, maintaining a strong presence in the U.S. market. Additionally, the Asia-Pacific region is anticipated to experience the fastest CAGR during the forecast period 2024-2029, with growth attributed to the increasing overall population base coupled with a large share of the elderly population, improving medical policies and healthcare infrastructure, and rising per capita income.

This comprehensive industry report provides market estimates and forecasts, accompanied by a detailed examination of the product type, application, end user, and region aspects. It delivers a quantitative analysis of the market, empowering stakeholders to leverage existing market opportunities. Furthermore, the report identifies key segments for potential opportunities and strategies, drawing insights from market trends and the approaches of leading competitors.

The global baby bottle market has been extensively analyzed by categorizing it according to various sub-segments in order to provide accurate forecasts of industry size and assess trends within specific areas.

The global market for surgical microscopes can be segmented by product type: conventional microscopes, advanced microscopes. Advanced microscopes is anticipated to show the highest growth rate during the forecast period.

Surgical microscopes market is further segmented by application: ENT, ophthalmology,

dental, neurosurgery , gynecology, spine, plastic and reconstructive, others. ENT was the highest contributor to the global surgical microscopes market, with 28.1% share in 2023. Going forward, the plastic and reconstructive segment is projected to witness the highest CAGR during the forecast period.

Based on end user, the surgical microscopes market is segmented into: hospitals, clinics, others. According to the research, the hospitals segment had the largest share in the global surgical microscopes market, accounting for more than 78.6% of the total market.

On the basis of region, the surgical microscopes market also can be divided into: North America, Europe, Asia-Pacific, MEA (Middle East and Africa), Latin America. North America was the highest contributor to the global surgical microscopes market, with 35.6% share in 2023. Going forward, Asia-Pacific is projected to witness the highest CAGR during the forecast period.

The global surgical microscopes market report offers detailed information on several market vendors, including Alcon, Inc., B. Braun Melsungen AG, BHS Technologies GmbH, Carl Zeiss MeditTech AG, Danaher Corporation, HAAG-STREIT Holding AG, Karl Storz SE & Co. KG, Munich Surgical Imaging GmbH, Olympus Corporation, Synaptive Medical, Inc., Topcon Corporation, among others. In this report, key players and their strategies are thoroughly analyzed to understand the competitive outlook of the market.

Why Choose This Report

Gain a reliable outlook of the global surgical microscopes market forecasts from 2024 to 2030 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.

Market Segments Covered in Global Surgical Microscopes Industry Analysis:

i.) Product type

Conventional microscopes

Advanced microscopes

ii.) Application

ENT

Ophthalmology

Dental

Neurosurgery

Gynecology

Spine

Plastic and reconstructive

Others

iii.) End user

Hospitals

Clinics

Others

iv.) Region

North America

Europe

Asia-Pacific

MEA (Middle East and Africa)

Latin America

Contents

PART 1. INTRODUCTION

- 1.1 Description
- 1.2 Objectives of The Study
- 1.3 Market Segment
- 1.4 Years Considered for The Report
- 1.5 Currency
- 1.6 Key Target Audience

PART 2. RESEARCH METHODOLOGY

- 2.1 Primary Research
- 2.2 Secondary Research

PART 3. EXECUTIVE SUMMARY

PART 4. MARKET OVERVIEW

- 4.1 Introduction
- 4.2 Drivers
- 4.3 Restraints

PART 5. GLOBAL SURGICAL MICROSCOPES MARKET BY PRODUCT TYPE

- 5.1 Conventional microscopes
- 5.2 Advanced microscopes

PART 6. GLOBAL SURGICAL MICROSCOPES MARKET BY APPLICATION

- 6.1 ENT
- 6.2 Ophthalmology
- 6.3 Dental
- 6.4 Neurosurgery
- 6.5 Gynecology
- 6.6 Spine
- 6.7 Plastic and reconstructive
- 6.8 Others

PART 7. GLOBAL SURGICAL MICROSCOPES MARKET BY END USER

- 7.1 Hospitals
- 7.2 Clinics
- 7.3 Others

PART 8. GLOBAL SURGICAL MICROSCOPES MARKET BY REGION

- 8.1 North America
- 8.2 Europe
- 8.3 Asia-Pacific
- 8.4 MEA (Middle East and Africa)
- 8.5 Latin America

PART 9. COMPANY PROFILES

- 9.1 Alcon, Inc.
- 9.2 B. Braun Melsungen AG
- 9.3 BHS Technologies GmbH
- 9.4 Carl Zeiss MediTech AG
- 9.5 Danaher Corporation
- 9.6 HAAG-STREIT Holding AG
- 9.7 Karl Storz SE & Co. KG
- 9.8 Munich Surgical Imaging GmbH
- 9.9 Olympus Corporation
- 9.10 Synaptive Medical, Inc.
- 9.11 Topcon Corporation

DISCLAIMER

I would like to order

Product name: Global Surgical Microscopes Market 2024

Product link: <https://marketpublishers.com/r/GD80C0E5141FEN.html>

Price: US\$ 1,650.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
