Abstracts

Surveillance cameras are video cameras used for the purpose of observing an area. They are often connected to a recording device or IP network, and may be watched by a security guard or law enforcement officer. There are many types of surveillance cameras. They can be categorized by shape (dome or bullet shape), the types of images they are able to capture, the amount of frames they can take per minute, the type of connection to the monitor or video recording device, whether they are able to move position, and special functions they can provide.

The report covers forecast and analysis for the surveillance camera market on a global and regional level. The study provides historic data of 2012-2016 along with a forecast from 2017 to 2022 based on both volumes and revenue. The study includes drivers and restraints for the surveillance camera market along with the impact they have on the demand over the forecast period. Additionally, the report includes the study of opportunities available in the surveillance camera market on a global level.

The report has been prepared based on the synthesis, analysis, and interpretation of information about the global surveillance camera market collected from specialized sources. The competitive landscape section of the report provides a clear insight into the market share analysis of key industry players. Company overview, financial overview, product portfolio, new project launched, recent development analysis are the parameters included in the profile.

The study provides a decisive view on the surveillance camera market by segmenting the market based on applications. All the application segments have been analyzed based on present and future trends and the market is estimated from 2017 to 2022.
