Abstracts

TBHQ, an aromatic organic compound and a derivative of hydroquinone, is widely used as food preservative for unsaturated vegetable oils and many edible animal fats. It does not cause discoloration even in the presence of iron, and does not change flavor or odor of the material to which it is added. It can be combined with other preservatives such as butylated hydroxyanisole (BHA).

The report covers forecast and analysis for the TBHQ market on a global and regional level. The study provides historic data of 2012-2016 along with a forecast from 2017 to 2022 based on both volumes and revenue. The study includes drivers and restraints for the TBHQ market along with the impact they have on the demand over the forecast period. Additionally, the report includes the study of opportunities available in the TBHQ market on a global level.
