Abstracts

Thick film materials are metal conductor pastes or dielectric ceramic pastes. They are screen printed and fired to produce circuits, resistors, capacitors, and interconnects for electronic devices on ceramic substrates. Garnering a CAGR of 6.6% from 2022 to 2028, the global thick film materials market is projected to reach worth of USD 21,208 million by 2028-end, according to a new report by Gen Consulting Company.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global thick film materials market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the thick film materials industry.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the product, application, and region. The global market for thick film materials can be segmented by product: conductor pastes, dielectric pastes, resistor pastes, others. The dielectric pastes segment held the largest share of the global thick film materials market in 2021 and is anticipated to hold its share during the forecast period. Thick film materials market is further segmented by application: automotive, electronic components, LTCC (low temperature co-fired ceramic), photovoltaic, printed circuit board, others. Globally, the photovoltaic segment made up the largest share of the thick film materials market. Based on region, the thick film materials market is segmented into: Asia Pacific, Europe, North America, Rest of the World (RoW). Asia Pacific was the largest contributor to the global thick film materials market in 2021.

By product:

conductor pastes

dielectric pastes

resistor pastes

others

By application:

automotive

electronic components

LTCC (low temperature co-fired ceramic)

photovoltaic

printed circuit board

others

By region:

Asia Pacific

Europe

North America

Rest of the World (RoW)

On the basis of country level, the market of thick film materials is sub divided into USA, Canada, Mexico, Germany, France, United Kingdom, Italy, Spain, China, Japan, India, South Korea, Brazil.

The global thick film materials market report offers detailed information on several

market vendors, including CMS Circuit Solutions, Inc., DuPont de Nemours, Inc., Ferro Corporation, Heraeus Deutschland GmbH & Co. KG, Indium Corporation, Koartan Microelectronic Interconnect Materials, LORD Corporation, Sumitomo Metal Mining Co., Ltd., Sun Chemical Corporation, among others.

Historical & Forecast Period

This research report provides analysis for each segment from 2018 to 2028 considering 2021 to be the base year.

Scope of the Report

To analyze and forecast the market size of the global thick film materials market.

To classify and forecast the global thick film materials market based on product, application, region.

To identify drivers and challenges for the global thick film materials market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global thick film materials market.

To identify and analyze the profile of leading players operating in the global thick film materials market.

Why Choose This Report

Gain a reliable outlook of the global thick film materials market forecasts from 2022 to 2028 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.

Contents

PART 1. INTRODUCTION

Report description
Objectives of the study
Market segment
Years considered for the report
Currency
Key target audience

PART 2. METHODOLOGY

PART 3. EXECUTIVE SUMMARY

PART 4. MARKET OVERVIEW

Introduction
Drivers
Restraints
Impact of COVID-19 pandemic

PART 5. MARKET BREAKDOWN BY PRODUCT

Conductor pastes
Dielectric pastes
Resistor pastes
Others

PART 6. MARKET BREAKDOWN BY APPLICATION

Automotive
Electronic components
LTCC (low temperature co-fired ceramic)
Photovoltaic
Printed circuit board
Others

PART 7. MARKET BREAKDOWN BY REGION

Asia Pacific

Europe

North America

Rest of the World (RoW)

PART 8. KEY COMPANIES

CMS Circuit Solutions, Inc.

DuPont de Nemours, Inc.

Ferro Corporation

Heraeus Deutschland GmbH & Co. KG

Indium Corporation

Koartan Microelectronic Interconnect Materials

LORD Corporation

Sumitomo Metal Mining Co., Ltd.

Sun Chemical Corporation
