Abstracts

A tonometry test measures the pressure inside eye, which is called intraocular pressure (IOP). It is an important test in the evaluation of patients at risk from glaucoma, an eye disease that can cause blindness by damaging the nerve in the back of the eye. Damage to the optic nerve may be caused by a buildup of fluid that does not drain properly out of the eye.

The report covers forecast and analysis for the tonometer market on a global and regional level. The study provides historic data of 2012-2016 along with a forecast from 2017 to 2022 based on both volumes and revenue.
