Abstracts

Transmission fluid is used to lubricate the components of a car's transmission for optimum performance. In vehicles with automatic transmissions, this fluid also acts as a coolant. There are several types of auto transmission fluids, and the type used in individual cars and trucks depends on the type of transmission inside. Automatic transmissions use regular automatic transmission fluid, as the name suggests. Manual transmission fluid can vary, however, using either plain motor oil, a transmission oil known as heavyweight hypoid gear oil, or automatic transmission fluid.
