Abstracts

Transparent conducting films (TCFs) are thin films of optically transparent and electrically conductive material. They are an important component in a number of electronic devices including liquid-crystal displays, OLEDs, touchscreens and photovoltaics. Gen Consulting Company estimates the global transparent conducting films market will total USD 6,928 million by 2028, an average annual growth of 7.7 percent during the forecast period, according to the latest edition of the Global Transparent Conducting Films Market Report.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global transparent conducting films market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the transparent conducting films industry.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the material, application, end user, and region. The global market for transparent conducting films can be segmented by material: carbon nanotubes, indium tin oxide (ITO), silver nanowires, others. The ITO segment was the largest contributor to the global transparent conducting films market in 2021.

Transparent conducting films market is further segmented by application: touch applications, others. Based on end user, the transparent conducting films market is segmented into: laptops & notebooks, LCDs, smartphones, tablets, wearable devices, others. On the basis of region, the transparent conducting films market also can be divided into: Asia Pacific, Europe, North America, Rest of the World (RoW).

By material:

carbon nanotubes

indium tin oxide (ITO)

silver nanowires

others

By application:

touch applications

others

By end user:

laptops & notebooks

LCDs

smartphones

tablets

wearable devices

others

By region:

Asia Pacific

Europe

North America

Rest of the World (RoW)

The report explores the recent developments and profiles of key vendors in the Global Transparent Conducting Films Market, including Abrisa Technologies (HEF Group), C3Nano, Inc., Cambrios Technologies Corporation, Canatu Oy, MNTech Co., Ltd., Nano-C, Inc., Nitto Denko Corporation, OFILM Group Co., Ltd., OIKE & Co., Ltd., Sekisui Chemical Co., Ltd., SHOWA DENKO MATERIALS CO., LTD., TDK Corporation, Teijin Limited, Toray Industries, Inc., Toyobo Co., Ltd., among others.

Historical & Forecast Period

This research report provides analysis for each segment from 2018 to 2028 considering 2021 to be the base year.

Scope of the Report

To analyze and forecast the market size of the global transparent conducting films market.

To classify and forecast the global transparent conducting films market based on material, application, end user, region.

To identify drivers and challenges for the global transparent conducting films market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global transparent conducting films market.

To identify and analyze the profile of leading players operating in the global transparent conducting films market.

Why Choose This Report

Gain a reliable outlook of the global transparent conducting films market forecasts from 2022 to 2028 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.
