Abstracts

Transparent conductive coatings are essential materials used in optoelectronic devices and photovoltaics. According to latest analysis by Gen Consulting Company, the global transparent conductive coating market is projected to climb to USD 9,231 million by 2028-end, progressing at a CAGR of 7.9% during 2022-2028.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global transparent conductive coating market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the transparent conductive coating industry.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the material, application, and region. The global market for transparent conductive coating can be segmented by material: conductive nanoparticles, conductive polymers, indium tin oxide, others. In 2021, the indium tin oxide segment made up the largest share of revenue generated by the transparent conductive coating market. Transparent conductive coating market is further segmented by application: EMI shielding and antistatic, OLED lighting, solar PV, touch screens and displays, others. The touch screens and displays segment was the largest contributor to the global transparent conductive coating market in 2021. Based on region, the transparent conductive coating market is segmented into: Asia Pacific, Europe, North America, MEA (Middle East and Africa), Latin America. Asia Pacific is estimated to account for the largest share of the global transparent conductive coating market.

By material:

Historical & Forecast Period

This research report provides analysis for each segment from 2018 to 2028 considering 2021 to be the base year.

Scope of the Report

To analyze and forecast the market size of the global transparent conductive coating market.

To classify and forecast the global transparent conductive coating market based on material, application, region.

To identify drivers and challenges for the global transparent conductive coating market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global transparent conductive coating market.

To identify and analyze the profile of leading players operating in the global transparent conductive coating market.

Why Choose This Report

Gain a reliable outlook of the global transparent conductive coating market forecasts from 2022 to 2028 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.
